

Extracts From G

A number of the claims making up the total acreage owned by the Company were staked by a group of well known prospectors, which included the late Benny Hollinger, the staker of the original famous Hollinger Mine in Porcupine, now considered one of the greatest gold mines in the world, and which produces approximately One Million Dollars in gold every thirty days. The estate of the late Mr. Hollinger ranks as one of the largest shareholders of the Matachewan Canadian Gold Limited. The results secured from development work. of the Matachewan Canadian Gold Limited. The results secured from development work, hereinafter outlined, supply the foundation for prac-tically every report that has been issued on the district from time to time, both by Dominion and Ontario Government geologists and independent engineers.

 Manchester, N. H., May 23.—Henry
 G4½
 Lapointe pleaded guilty in police court
 to a charge of putting glass in the street. Judge Perkins fined him \$5 and costs of \$4.70. Lapointe had just stepped around a corner with two other young men to take a drink from a bottle when an officer appeared. Lapointe, who was holding the bottle, let it fall, and the moist earth soaked up the evidence of illegal possession the police otherwise might have obtained.

## History and Location of Matachewan Camp

History and Location of Matachewan Camp The Matachewan Gold Area was discovered in 1916 by the late Sam Otisse, one of the oldest and best known prospectors in Canada, the original dis-covery claims now forming a part of this Company's property. It is situated in the District of Temis-kaming, Northern Ontario, and embraces the Town-ships of Powell, Yarrow, Cairo, Kimberley, Baden. Alma, Bannockburn, Holmes and Flavelle. It is reached by the T. N. O. Railway to Elk Lake and thence by boat up the Montreal River or by road into the Camp. The Matachewan Camp proper, that is to say, the area where the greatest amount of development work has been accomplished (largely by this Company) is located in the Townships of Powell and Cairo. It is approximately 28 miles southwest of Kirkland Lake and 38 miles south of Porcupine, two of the largest producing gold camps Porcupine, two of the largest producing gold camps of the Western Hemisphere, and among the greatest in the world.

## Development

Development During the years 1918, 1919 and 1920, working under most difficult conditions—due to the fact that the property was situated 25 miles from the railroad, and consequently inaccessible; also to the absence of electrical power, the merged companies expended in excess of \$500,000 in acquiring claims and conducting an extensive campaign of diamond drilling, surface trenching and underground work. In order to carry out this programme, the Company installed a fairly complete mining plant and equipment, together with the required buildings and bunk houses. This in-wolved the taking in of the necessary machinery, materials and supplies, over a country where no roads were available at that time. The results se-cured, however, conclusively warranted this expendicured, however, conclusively warranted this expenditure

In due course application will be made to list this stock in Toronto and New York.

We are now offering for public subscription, for a limited period, the unsold portion of 600,000 shares of the Matachewan Canadian Gold Limited at \$1.00 (par value) a share. Our confidence in this mine is so great that, if, within 30 days after you buy this stock—if bought di-rect through our Office—and after a personal examination of the records and data on file in our office, you are not perfectly satisfied with your investment, we will refund your money in full.

attractive policy.

St. John.

In a publication issued by the Department of Mines at Ottawa under the name of "Geology of Matachewan District, Northern Ontario," Mr. H. C. Cook, Government Geologist, who made a thorough study of the Matachewan Area, stated in effect:

Cook, Government Geologist, who made a thorough study of the Matachewan Area, stated in effect: "The porphyry mass on these claims (Mata-chewan Canadian Gold Limited) is the largest yet discovered in the District being somewhat over one-half mile in length and 500-600 feet in width." "Channel samples, taken along the bottom of trenches in the enriched areas by the engineers ex-amining the property, are said to have given values carrying from \$5.00 to \$25.00 per ton." "The dykes contain sufficient auriferous pyrite to yield values carrying from \$3.00 to \$50.00 per ton with an areage of about \$10.00." In the 29th Annual Report of the Ontario De-partment of Mines, published in 1920, is given the results of an exhaustive examination of the Mata-chewan Area as carried out by Mr. A. G. Burrows, Geologist for the Department. It is considered that no more favorable report has ever been issued in Canada on any gold area in the same stage of prelimi-nary development. On Page 61, Paragraph 2, in his report on this Company's property, Mr. Burrows states as follows: states as follows:

states as follows: "In places the altered and mineralized light grey schist is 10 to 25 feet in width. One mass of ore to the northeast of No. 1 shaft is 50 feet long, with an average width of 30 feet. Two cross sections of this ore showed assay values of \$12.75 over 27.35 feet and \$18.31 over 22.75 feet. Another lens of light grey ore can be traced westward from No. 2 shaft for 100 feet into low ground. This ore averages about ten feet in width. In trench 200 one section 14.5 feet in width, of light greenish calcareous schist containing a band of grey porphyry showed an as-say value of \$20.25."

## Conclusion

Conclusion An estimated ore tonnage of 36,857 tons has been indicated by the above work. Basing these estimates on the complete reports of the engineers, aggressive operations over a period of six to eight months should open up 150,000 to 200,000 tons of \$11.00 ore, approximating in value \$2,000,000, and permit the erection of a mill, thus placing the Company on a producing basis within a very short period. We would draw your attention especially to the Board of Directorate of this Company, which con-stitutes one of the strongest group ever brought to-gether in any single mining enterprise.
