St. John Branch: W. L. Caldwell, Manager.

Canada's Railway Problem—its Solution

The \$70,000,000 deficit for 1920 in the operation of their National Railway has brought home to Canadians the extreme gravity of the Railway Problem. In May Investment Items an interesting solution is suggested. It proposes to relieve the Grand Trunk of the Grand Trunk Pacific, provide the parent road with adequate working capital and put it under control of the best group of Canadian business men that can be found. It suggests amalgamation of the Canadian National Railway with the Canadian Pacific Railway, to give the former the benefit of the latter's expert executive direction. The terms of such a combination are suggested on a basis equitable to both the Dominion Government and shareholders of the Canadian Pacific. The number should be read by every Canadian business man. A postal will bring you a copy.

Royal Securities CORPORATION LIMITED

ST. JOHN, N.B. Branch Manager

Montreal Toronto Halifax Winnipeg Vancouver New York London Eng.

have come to investigate the possibility of a combination of the two railways. Intelligence reaches Toronto that many more are coming and this year promises to be a banner one in this respect.

This week a representative from Birmingham arrived in Toronto along with other representatives from British manufacturers. The Birmingham man represents a pressure gauge manufacturer and he has come to appoint local agents. He is convinced that British makers can compete with United States in this line.

Another arrival is the managing director of a well-known merchant banking house in London, who is here to place the Canadian agency for a British disinfector. He desires to get in touch with Canadian manufacturers who want active representatives in London.

A third visitor is from a Manchester textile firm who has come to sell textile machinery in connection with cancelled orders. This representative is looking over the ground with a view to establishing a branch plant in Canada.

IRON, STEEL, METAL AND MACHINERY MARKET

In its summary of the iron, steel and machinery markets for week ending May 12th, Canadian Machinery and Manufacturing News, Toronto, makes the following comment:

Dullness is the outstanding characteristic of the trade in steel, iron and machine tools this week but in spite of it some firms report receiving very fair orders, while a number of others have prospects that look certain for real business in a short time. Prices in a number of special lines are being cut to some extent, while firms that find themselves with too much stock in certain lines are making the market.

IRON, STEEL, METAL AND MACHINERY MARKET

In its summary of the iron, steel and machinery markets for week ending May 12th, Canadian Machinery and Manufacturing News, Toronto, makes the following comment:

Dullness is the outstanding characteristic of the trade in steel, iron and machine tools this week but in spite of it some firms report receiving very fair orders, while a number of others have prospects that look certain for real business in a short time. Prices in a number of special lines are being cut to some extent, while
