

### BUILDINGS.

THE COLLEGE BUILDING is situated on the brow of University Hill, facing Main Street northward, and overlooking the Campus and the town. It is a large, substantial structure, of pleasing proportions, containing many class and lecture rooms, an Assembly Hall, Library, Museum, Chapel, Chemical Laboratory, Physics Department and the President's Office. In the east end of this building the Academy Classes (except Manual Training Classes) are conducted. The class rooms are successively adjacent, rendering the movement of classes from one room to another prompt and easy.

THE ACADEMY HOME, 84x45 feet, contains three stories and a basement. It is adjacent to the Campus, and faces it to the eastward. It provides comfortable accommodation for about forty-five Students, is abundantly supplied with pure water from the town system, and contains bath-rooms provided with hot and cold water. The Students' rooms are amply lighted, also well heated and ventilated.

THE EDWARD W. YOUNG MANUAL TRAINING HALL, recently erected through the generosity of Charles E. Young, Esq., of Falmouth, is 70 feet long and 35 feet wide, with a front portico and pediment. It is situated on the border of the Campus, near the Academy Home, and faces the University and Seminary buildings.

One-half of the lower story is fitted up as an Iron-working Department. The other half is reserved for moulding, casting and machine work. Two-thirds of the second story is partitioned off for the Wood-working Department, the other third for the Drawing Department. The upper story contains stock, etc., for Students' use.

### SURROUNDINGS.

The surroundings of this School are extremely healthful and beautiful. The Basin of Minas, whose waters approach within a quarter of a mile of the Academy, affords a delightfully cool atmos-
