

QUESTION OF NEXT WINTER'S FUEL

COAL SHORTAGE PROMISES TO BE MORE ACUTE.

Suggestions Given by Commission of Conservation for Relief of Fuel Situation.

The fuel situation in Eastern Canada will be fully as bad if not worse next winter, and it is imperative that steps be taken at once to provide substitutes for coal. With an increasing labor shortage in the United States, increased demands upon the railways, increased requirements for American coal for domestic and export purposes, and the placing of Canada on "war-rations" by the United States Fuel Controller, it will be fortunate if Canada secures as large supplies of coal as she has this season.

Utilize Our Forests.

We must fall back upon our forests, Ontario, Quebec, and New Brunswick contain vast quantities of hardwood which has little present value except for fuel purposes. A cord of seasoned hardwood, such as hard maple, beech or birch, is approximately equal in heating value to a ton of anthracite. Under normal conditions, coal has been cheaper, but, at present prices, the difference in cost is not very great. What is needed now is immediate action on the part of municipal authorities to lay in an emergency stock of wood fuel, both on account of the shortage of labor for cutting and hauling, and the necessity for having the wood out to dry during the summer. The city of Winnipeg laid in a reserve supply of 14,000 cords of wood this season, and the mayor reports this was an important factor in averting a fuel crisis. Ottawa also has decided to establish a civic fuel yard.

Co-operation Needed.

To supplement the efforts of city and municipal governments, co-operation of the provincial governments is, in many cases, essential. Where timber on Crown lands is sufficiently accessible, a special organization is needed to facilitate the completion of arrangements, including the organization of labor for cutting on a large scale. The Provincial Forester, or some one working under his direction, should take the whole matter up vigorously with the respective city and municipal governments, and assist in determining the needs of the local situation in each case, and how best to meet them. A beginning in this direction has already been made in Quebec, and it is reported that Ontario is offering wood in Algonquin Park free to municipalities and is co-operating with them in organizing production.

Some Suggestions.

Experience has shown it is quite feasible to materially relieve the coal shortage by a more extensive use of wood in the following directions:

1. By farmers and rural communities generally, within easy reach of wood supplies, making as general use of this fuel as possible, to relieve the demands for coal and freight cars alike.
2. The general substitution of wood for coal in furnaces and stoves during early autumn and late spring, as well as during mild weather in winter.
3. The heating by wood of churches, lodge rooms, halls, etc., where warmth for only a limited period of time may be necessary.
4. The eking out of limited stores of coal by burning wood in the daytime, reserving coal for holding the fire overnight.
5. Running furnaces low to keep the house in general only warm enough to prevent water pipes from freezing, and supplementing this by using wood in stoves or grates to keep the living and dining rooms comfortable.
6. Using wood much more generally than at present as a substitute for coal in cooking.
7. By making windows and doors tight and by insulating furnaces, boilers and piping, as suggested by Senator W. C. Edwards, who also advocates that stoves and mill waste, instead of being burned in incinerators, should be reserved for domestic heating.

Race Origin of Canadian People.

The race origin of the people of the three prairie provinces is dealt with in a bulletin issued by the Census Branch at Ottawa. The returns show that of the total population persons of British origin constituted 57.76 per cent. in Manitoba, 54.5 per cent. in Saskatchewan, and 60.18 per cent. in Alberta. The French race possessed 6.1 per cent. of the population of Manitoba and about 5 per cent. of that of Saskatchewan and Alberta. Persons of German origin represented 4.67 per cent. of the population of Manitoba, 11.9 per cent. of Saskatchewan and 6.85 per cent. of Alberta.

Trousters While You Wait

When the poorest class of Gouchos, who live in a very primitive state in the Southern Argentine Pampas, need a pair of pants, they kill an old mare and strip off the hide of the forelegs, as one would draw off a glove.

These are drawn, hair side in, over feet and legs up to the hips, when they adjust themselves like tighties. They are thus worn continuously day and night until a new pair is needed.

THE STARTING POINT OF CONSUMPTION

Lies in Weak, Watery Blood—Dr. Williams' Pink Pills Make the Blood Rich, Red and Pure.

Weak, watery blood is the starting point of consumption. When your blood is in this condition your whole health declines. Your face becomes pale or sallow, your appetite fails, your heart jumps and flutters at the least exertion or excitement. You are always weak and wretched and you lose interest in both work and amusement. This is the point from which you may easily step into that hopeless decline that leads to consumption and the grave. What is needed to bring back health, strength and energy is the new, rich red blood Dr. Williams' Pink Pills actually make. In all the world of medicine there is no other tonic and blood builder like them, and all who feel weak, run-down or easily tired should lose no time in giving these pills a fair trial. They have transformed thousands of weak, hopeless men and women, boys and girls into strong, robust people. In proof of these statements may be given the experience of Mrs. T. Brennen, Charlott, Ont., who says: "Not only myself, but my friends think that had it not been for Dr. Williams' Pink Pills I would have filled a consumptive's grave. My condition was most serious; my blood seemed literally to have turned water; I was as pale as a sheet and became utterly unable to do any housework or go about. I doctored steadily for a long time but was growing weaker, and finally the doctor held out but little hope for my recovery. It was thought that a trip might help me and I was taken to New Ontario. Those who saw me while on my way did not think I would reach my journey's end alive. After I reached my destination a friend strongly urged me to try Dr. Williams' Pink Pills, and as of course I was anxious to regain health I did so. The pills were the first medicine I had taken which seemed to help me at all, and it was not long until I felt they were doing me good. I continued their use gladly, and began to feel hungry and soon after was able to move about the house. Next I was able to go out of doors and to help in the housework, and from that time on my progress was rapid, and in the end I was enjoying better health than I had ever done before. There are many people who can testify to the absolute truth of these statements, and I feel I would not be doing justice to your wonderful medicine if I did not make these facts known."

You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

WHO ARE THE BEST FIGHTERS?

The Canadians Are Generally Admitted to Carry the Palm.

Early in the war the British War Office found it expedient to enter objections to the tartan kilt on the battlefield on account of its conspicuous colors affording too distinct a target for the enemy. An order was issued requiring the "Kilties" to wear a kilt made exclusively of khaki. To this the Highland regiments, with their devotion to the tartan, objected, and substituted for the all-khaki kilt a khaki apron which hid the conspicuous tartan colors in front.

The War Department again complained that their orders were not being complied with, and to this the Highlanders quickly replied, asserting that requirements had been fully met by the wearing of the khaki apron in front, for no Highlander ever turned his back to the enemy. Hence it had become generally accepted that the Highland regiments were the best fighters.

But now the New York Times claims that it is generally admitted in Europe, by French and British alike, that the Canadians are the best fighting men in the trenches, and adds in support of the claim "they are never subject to periods of high elation, which give them great elan in attack, and later periods of great depression, which seriously affects their morale, as are the French. Nor is the lack of brilliancy individually or the absence of the great enthusiastic action of the French in attack, both of which in a general way characterize the British. The Canadians possess almost all of the brilliancy and enthusiasm of the French, combined with the steadiness and absolute dependability of the British to get what they go after if it is humanly possible. It is purely a question of temperament, and of the environment of their youth. In both, the American and the Canadian are alike, and their action in battle will be the same."

We little realize how children cherish their gardens. No flower ever cost more than a little pansy that was brought me by a generous, sweet little seven-year-old girl last autumn: "You will put it right in water, won't you, and keep it? It is the very last flower from my pansy bed this year."

Gunns Shur-Gain Fertilizer

TRAINING CANADIAN YOUTH.

The Demand for Technically Trained Workers is Imperative.

Probably 100,000 boys and girls from 14 to 16 years of age annually leave school in Canada to engage in some occupation connected with manufacturing, agriculture, mining or transportation. The present general plan of education does not provide sufficiently for these young people. They are stepping out into the world to find their way, with an almost entirely literary education. The apprentice system in our industries is almost a thing of the past, and the youth in our factories and other business organizations is left to pick up a smattering of his future occupation as best he may. Notwithstanding this, every manufacturer will agree that properly trained help is the best investment. Germany, in the past few years, has amply demonstrated the value of technical training.

Canada has very important natural resources requiring capacity to develop them. What are we doing to produce this capacity? How many of our farmers' children know the qualities of soil and the proper fertilizers to use for best results? Mr. Choquette has told us of the Belgian farmer's knowledge of his land and his scientific use of it. Can we hope to meet him on even terms? How many metal workers know the composition and working qualities of their raw materials. Do our carpenters, textile workers, employees in our ceramic and other industries know why they perform certain operations and why they secure the results they do?

We are not doing justice to the rising generation. At the close of the war, Canada will no doubt see an influx of immigrants from the European countries. Their system of industrial training has put them in a position to understand the theoretical as well as the practical side of their means of livelihood. Canada will have to meet these European countries in competition for trade, and, to do so successfully, her manufacturing and other lines of activity must utilize all trained help available; to secure this result it will be necessary to give the most important positions to our foreign-born residents. We may then realize, too late, that we have been unfair to our own children. Industrial training schools with night classes should be a part, and an important part, of all educational work, and attendance of pupils, up to at least 18 years of age, should be compulsory.

A Tribute to a War Dog.

I turn the crimson page of war, And here I find your name, A comrade, shell and shrapnel scarred, And plumed in battle fame.

A friend of man, a friend of God, Of royal blood and true, Who met the hell-hounds, breast to breast,

A soldier, through and through.

Ye trumpets sound a requiem, Ye red, red waters, cry Your lamentations, coast to coast, And darkness hide the sky;

Kneel, kneel, ye slaves of high estate, O blue-flower bow your head! A dog that shames an emperor, Somewhere, somewhere lies dead.

—Herbert Randall.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Victors Overseas.

The other day a laconic British official statement announced the completion of the campaign in German East Africa. Its significance was little appreciated by a world whose attention was fixed upon Cambrai and the Russian revolution. And yet it marks the passing of one of the great colonial empires of modern times. When the war broke out German colonies occupied more than a million square miles of African territory, an empire in area larger than that lost by France under the old monarchy in the wars with Britain which preceded the Napoleonic era.

Bagdad, Jerusalem, German Africa—these are measures of the present struggle between the Briton and the German. We are now in the fourth winter of the war, a war which German statesmen and German scholars quite as much as German soldiers proclaimed was to be a contest between a modern Rome and a contemporary Carthage, a contest in which the German should play the Roman role. And after four campaigns no German ship sails the seas, every German colony in British hands, save for those portions occupied by Britain's French and Japanese allies; Germany's Turkish ally has lost Mesopotamia and the Holy Land; British armies occupy the roads to Suez and the Persian gulf, and no single foot of British territory has now a German master.

OLD GENERAL HUNGER.

Allied Europe Needs 290,000,000 Bushels of Wheat.

The Food Controller says Allied Europe is short of 500,000,000 bushels of wheat. On Dec. 1 last, Canada had 110,000,000 bushels for export. On the same date, the United States, after allowing for the normal consumption of her own people, had not a single bushel, although Mr. Hoover thinks that, by economy and substitution, they will be able to export about 100,000,000 bushels. Where will Allied Europe procure the balance of 290,000,000 bushels to keep her from starving?

On account of the shipping situation it must come from America and Canada, as the granary of the Empire, must put forth a supreme effort, says Conservation. The farmer must have additional labor. He is doing his best now, and no amount of talking at him will induce him to put in a larger crop this spring. Provide him with extra help in seeding if you will, but he will not increase his crop acreage unless he is assured of enough help in harvest. Even in old-settled Ontario there has been for years a large acreage uncropped for lack of help. It is equally true that there are in our cities and towns many farm-trained men who work not as essential as farmers, who would assist in the crucial periods of seed-time and harvest if the law protected them in their positions and possibly made up a part of the difference between their ordinary earnings and what they would receive as farm laborers. We have conscripted men for overseas; what are we going to do to feed our Allies?

Man-power is needed for fighting, for munition working and for a food production, and whichever is the most urgent should have the most men allotted to it. In such times as these, it is given only to those in high authority to know conditions fully, but if the food administrations of Canada and the United States portray things as they are, the food situation is the most serious we have yet had to face. It is only when the ordinary citizen realizes this that the problem can be solved.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

CAMOUFLAGE TRAPS U-BOAT.

Trick by Which British Seamen Destroyed a Submarine.

Camouflage by the gun crew of a British steamer tricked a German U-boat commander into the belief that he was attacking an unarmed merchant vessel and caused him to maneuver his boat so that the gunners of the merchant vessel were able to send him and all on board to the bottom. The story was told by an officer of a British ship which recently arrived at an American port.

The steamer was nearing a French port with a cargo of foodstuffs and ammunition when the U-boat appeared.

"The German was some distance away when we first saw him," said the British officer, "and at the same time he was watching us through the periscope. The gun crew was all ready. Our big gun was hidden behind a screen, which covered the entire stern and which had been painted, both at starboard and port, to look like lifeboats. The U-boat came on. When about twenty yards off, the commander, evidently having satisfied himself that we were unarmed, ordered the vessel sunk by bombs.

"Several men clambered from the forward hatch, dragging one of their collapsible boats after them. Officers stood on deck, leaning against the conning tower, as they waited for our fire. Meanwhile the gunners had been working behind our lifeboat screen, and while the Germans were preparing their boat the gun pointer signalled the range.

"The screen was dropped, and before the Germans were aware of the trap they had fallen into, the big gun roared. We saw the shell tear into the hull at the water line and directly at the base of the conning tower. The submarine sank in less than four minutes, with all its crew."

Skimmed milk furnishes protein at about half the outlay for which this essential can be purchased as milk: it is also a valuable source of carbohydrates and mineral water. The deficiency of fat in skimmed milk is counterbalanced by the fat of the ordinary mixed diet.

Minard's Liniment Cures Diphtheria.

The Doctor Did Not Do Her Lasting Good

So Mrs. Jos. Roger Used Dodd's Kidney Pills.

Popular New Brunswick Teacher Tells What Splendid Results She Got From Dodd's Kidney Pills.

Elm Tree, Gloucester Co., N.B., Feb. 11th.—(Special).—"When the doctor I consulted failed to do me any lasting good I decided that my kidneys were the root of my troubles, and made up my mind to try Dodd's Kidney Pills.

"You may judge of the results when I tell you that I have not lost a day's work as teacher during the past year. That is the statement of Mrs. Jos. Roger, the well-known and popular teacher here. Just how ill she was before using Dodd's Kidney Pills is best told in her own words.

"My trouble came from a strain," she says, "and I suffered for thirteen months.

Backache, heart fluttering, sciatica, neuralgia, nervousness, dizziness, and falling memory were among my symptoms.

"I took 12 boxes of Dodd's Kidney Pills in all, and I can say for them that they have done me all that was claimed for them."

If you have any of the symptoms that troubled Mrs. Roger, ask your neighbors if Dodd's Pills are not the remedy you are looking for.

Use For Old Sheets.

Being of an economical turn of mind, it has always bothered me to know what to do with the sides of worn-out sheets, which are many times perfectly good when the center will be thoroughly worn. This summer I conceived the idea of making them into pillow cases and, as I always make the two hems in my sheets the same width, it was a very simple thing to do.

Fairville, Sept. 30, 1902.

Minard's Liniment Co., Limited.

Dear Sirs,—We wish to inform you that we consider your MINARD'S LINIMENT a very superior article, and we use it as a sure relief for sore throat and chest. When I tell you I would not be without it if the price was one dollar a bottle, I mean it.

Yours truly,

CHAS. F. TILTON.

The Perfect Day.

What a day that will be when the tidings are flashed over sea and land that the Allies have won and peace has been declared! From ten thousand times ten thousand steeples what bells will ring out, as if they were human things, their wild delight at the long hoped-for event! Never in the history of the world will there have been such a day of universal joy.

Minard's Liniment Cures Distemper.

Drying Sweaters.

After washing sweaters do not hang them up to dry, but place them on a steam radiator or in an open oven, so that the weight does not pull them out of shape.

ACID STOMACH IS DANGEROUS

MOST FREQUENT CAUSE OF CHRONIC DYSPEPSIA.

You must neutralize the acid in your stomach, says Doctor, or give up eating sweets, meats, potatoes and salads and quit drinking tea, coffee or liquor.

Alarming increase in dyspepsia and stomach disorders is largely due to too much rich food, and the widespread use of so-called "digestive" tablets and pills which give only temporary relief at the expense of ruining the stomach later on.

The best way is to consult a reliable stomach specialist and take a little Epsom's Magnesia—nothing else—to neutralize stomach acidity and thereby remove the cause of your stomach distress.

Put a teaspoonful of hydrochloric acid in your mouth, hold it there five minutes and all the tissues will be burned and inflamed. Yet you go around with a glassful or more of this same powerful acid in your stomach, and then wonder why your stomach burns and hurts and your food will not digest. And when you put food into an acid stomach, the acid simply combines with the sweets, meats and potatoes you eat and the tea, coffee and liquors you drink, and makes a lot more acid.

Next, the acid may eat into your stomach walls, producing a stomach ulcer or cancer, and only half the cases of stomach ulcer ever get well under the most skillful treatment; the others, sooner or later, all die, and stomach cancer practically always means death in a year at most. But this is not all. The acid in your stomach passes on into the intestines, upsets them and disarranges your liver, so that you may soon require a serious operation with the surgeon's knife for gall stones or appendicitis.

Generally when people have sour or acid belching or eructations, heartburn, or a burning sensation at the pit of the stomach or other symptoms which indicate stomach acidity, they take some advertised digestive pills or buy a box of tablets from the nearest druggist. Such remedies may give temporary relief, but if you go on filling your stomach with a lot of drugs you may get to the point after a while when no food of any kind will stay on your stomach, and you will have an

Tank Possibilities.

Tanks (says a correspondent of the Evening Standard) are the popular subject of the moment, and every kind of rumor is abroad regarding their development. It can be no secret that the type goes on improving. Colonel Stern, who has been responsible for the production of the Tank, has always been most insistent in their possibilities. It will be remembered that he recently changed his job from Director of Tanks Production for similar work in the Overseas and Allied Department. It is understood that the United States has been greatly impressed with Tank possibilities. A concerted movement of production by England and America might have great results.

Minard's Liniment Cures Colds, Etc.

Fresh Air Without Draught.

As storm windows interfere with ventilation in sleeping-rooms tack the cheapest grade of unbleached muslin on the outside of the screens. This protects the wire from the weather and the windows may be open day and night, thus keeping the air fresh without a suggestion of cold draught.

MONEY ORDERS

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Rabbit Wool.

Rabbit hair is supplanting wool in the felt hat making industry of Australia, where there are thirty factories in operation at present making use of rabbit fur for this purpose. It is said to be superior to the finest merino, and millions of rabbit skins are made use of annually.

MURINE Granulated Eyelids,

YOUR EYES

Murine Eye Remedy At Your Druggist's or by Mail. It is the only eye remedy that cures all eye troubles. It is the only eye remedy that cures all eye troubles. It is the only eye remedy that cures all eye troubles.

The demand for fruit will be great or greater than ever because prosperity will prevail, and that means that people will want good things to eat. Good things to eat means fruit.

YES! LIFT A CORN OFF WITHOUT PAIN

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.
