TORTURED BY RHEUMATISM

"FRUIT-A-TIVES" Brought Quick
and Permanent Relief

MR. P. H. MCHUGH

108 Church Street, Montreal.

December 10th, 1917.

"I was a great sufferer from Rheu-
matism for over 10 years. I consulted
specialists, took medicines, used
lotions; but nothing did me good.

Then, I began to use "Fruit-a-
tives"; and in 15 days, the pain was
easier and the Rheumatism was
better. Gradually, "Fruit-a-tives"
overcame my Rheumatism; and now,
for five years, I have had no return
of the trouble. Also, I had severe
Eczema and Constipation, and
"Fruit-a-tives" relieved me of these
complaints; and gave me a good
appetite; and in every way restored
me to health." P. H. MCHUGH.

50c. a box, 6 for \$2.50, trial size 25c.

At dealers or sent post paid on
receipt of price by Fruit-a-tives

Limited, Ottawa, Ont.

Rev. John Elder will be inducted as
pastor of Melbourne and Riverside
Presbyterian churches on Thursday,
May 22, at 2.30 o'clock.

Owing to the unavoidable absence
of Sir Adam Beck, who was called to
Hamilton on account of the illness of
Mrs. P. D. Crenar, Lady Beck's moth-
er, the deputation which went to
London from Glencoe on Friday was
unable to secure all the information
desired regarding hydro. Glencoe's
needs, however, were fully stated to
Chairman Pocock of the Public Utili-
ties Commission, and Engineer Bu-
chanan, who promised to bring the
matter before Sir Adam Beck and ar-
range an engagement very shortly.
Chairman Pocock very kindly met the
members of the deputation at the
Utilities building and exhibited the
new quarters to them.

PERSONAL AND SOCIAL

—M. L. Farrell was in Chatham on
Saturday.

—Mrs. Lamont is visiting in Strath-
roy for a few days.

—Mrs. Farrell and her sister, Mrs.
Taylor, spent Friday in Bothwell.

—Miss Adeline Poole of London
spent the week-end at her home at
Tait's Corners.

—Mr. and Mrs. John O. McKibbin
left on Monday for their new home at
Jenner, Alberta.

—C. W. Davidson of Woodstock was
in Glencoe on Tuesday attending the
funeral of Mr. Roome.

—Craig Hyndman of Windsor
recently spent a few days with his
grandmother, Mrs. W. G. Craig.

—Mrs. D. G. McPherson of Rodney
has returned home after visiting rel-
atives and friends in Glencoe and vic-
inity.

—Miss Winnifred Poole spent the
week-end with her aunt, Mrs. A. D.
Davidson of Duluth, at the Hotel
Plaza, Detroit.

—Mr. and Mrs. Lewis Suttler are at
Milvorton attending the funeral of Mr.
Suttler's sister, Mrs. Ed. Campbell,
who died suddenly on Saturday evening.

—Mrs. James A. Taylor of La Quina,
Pa., was here for several days on a
visit to her sister, Mrs. M. L. Farrell,
and left on Tuesday to visit her daugh-
ter, Mrs. Werner, at Cayuga Falls.

—Mr. and Mrs. Arch. Johnson, Miss
Sadie E. and Master John A. Johnson,
Mr. and Mrs. Donald Johnson, Miss
Annie M. and M. J. D. Johnson of Mel-
bourne attended the graduating exer-
cises at Victoria Hospital, London,
last week, one of the graduates being
Miss Annie M. S. Johnson, daughter
of Mr. and Mrs. Arch. Johnson.

corn, all house dried, also a good Dur-
ham steer calf one month old.—Walter
Hallstone, Route 1, Glencoe.

Most good things come to those who
bustle while they wait. The man who
hustles while he waits for a better
thing than he has until he tumbles over it
in the dark during house-cleaning
time.

WHEAT FIELD DRAINAGE

Surface Drainage of Value in
Growing Winter Wheat.

Black Knot Responsible for Great
Losses Among Plum and Cherry
Growers—How It Can be Con-
trolled With Least Expense.

(Contributed by Ontario Department of
Agriculture, Toronto.)

SURFACE drains are used to re-
move excess water of soils due
to violent showers or the rapid
melting of snow and are con-
sequently often almost as important
on tile-drained land as on that which
has no artificial drainage. These
drains often prevent the gullying out
or the washing away of soil and soil
fertility.

Good surface drains will lessen
considerably the amount of winter
wheat "drowned out" or "winter
killed." These injurious effects are
largely caused through water stand-
ing on frozen wheels of ground in the
spring. Were this water removed by
surface drains, the reason for heav-
ing so often seen in wheat fields in
the early spring would be largely
removed. These drains are a benefit,
too, in that the removal of surface
water enables the land to warm up
more quickly, and the plants to start
growth earlier in the spring.

Surface drains should follow the
natural low levels in the wheat field
and be made before the season closes
in the fall. They are easily run out
with the ordinary long or the swivel
plough, and generally do not require
to be more than one furrow wide
and one furrow deep. Intersections
should be well made to avoid stop-
pages in drainage system. Heavy
clay soils are usually more benefited
by the use of surface drains than are
lighter soils.—Prof. W. J. Squirrell,
Ontario Agricultural College, Guelph.

To Cure Black Knot Disease.
No other cause, not even winter-
killing, has destroyed and is destroy-
ing so many cherry and plum trees
in this province as the Black Knot
disease. This statement, while true
of the province as a whole, is not
true of the Niagara District nor of
any other district where plum and
cherry trees are carefully pruned and
sprayed each year.

The disease is not caused by grubs,
although these are often found in
the knots, but it is caused by a fun-
gus which attacks the branches and
causes black, knot-like swellings,
usually about three inches long and
about half an inch in thickness,
though often the swellings are much
larger, often as long as a foot, and
longer, the longest ones usually be-
ing found on the larger branches.
New knots at first are brownish in
color, but later they become black.

The disease will in some orchards
confine itself to cherry trees and not
attack the plums. In other cases it
will attack plums and not the cher-
ries, but more commonly both are
attacked.

Control Measures.—In order to
control Black Knot thoroughly it is
helpful to know that it is spread by
means of tiny spores which act as
seeds, and are blown by the wind
from tree to tree. These spores are
formed on the knots themselves.
There are two main crops of them
each year, the first during early
spring, usually in March and April,
and the second in late spring, usually
the latter part of May and all of
June. Therefore, to control the dis-
ease the first step to take is to cut
down all dead and dying trees and
remove all knots on other trees, cut-
ting in each case about four inches
below the knot so as to be sure the
infected area is removed. If knots
occur on the very large branches or
on the trunk, they may be removed
by means of a chisel or a very stout
knife and chisel. In each case at least
of the bark on each side of the knot,
if possible, be taken with the knots. All
prunings, whether of dead or living
wood, should be burned at once,
Saidie E. and Master John A. Johnson,
Mr. and Mrs. Donald Johnson, Miss
Annie M. and M. J. D. Johnson of Mel-
bourne attended the graduating exer-
cises at Victoria Hospital, London,
last week, one of the graduates being
Miss Annie M. S. Johnson, daughter
of Mr. and Mrs. Arch. Johnson.

otherwise the spores will form on
them and spread from them. It is
very important to do this cutting out
and pruning before Christmas time.
Warm days after the leaves are off
are excellent for the purpose. Under
no conditions must the knots be left
on the trees until as late as February.
In cutting do not overlook wild
cherries that may be infested around
or near the orchard.

The next step is to spray the trees
with either lime-sulphur wash or
Bordeaux mixture, so that the spores
that come from a distance in early
or late spring may not get a chance
to germinate. Three sprayings should
be given, the first a few days before
the buds burst, the second about a
week after blossoms fall and the third
about two weeks later or just before
the earliest cherries begin to ripen.
Arsenate of lead should be added to
each of the last two applications to
kill the Plum Curculio and to keep
the cherries free from maggot.

The lime-sulphur for the first spray
should be in strength about one gal-
lon to fifteen or twenty gallons of
water, and for the second and third,
one gallon to about forty gallons of
water. Bordeaux for any application
should be composed of four pounds
of bluestone and four pounds of fresh
lime in six or six gallons of hydrated
time to forty gallons of water. The
arsenate of lead should be at the
strength of two and a half pounds
per gallon to forty gallons of water,
or liquid or half this amount if the
powder form is used.

It requires several years to free
one time or six years if the trees are
—L. Caesar, B.S.A., Provincial
Entomologist.

Their Pride Is a Deeper Thing

The fact that an Overland Model 90 stock car recently broke the world's non-stop high gear record in Oklahoma, U. S. A., does not add to the pride of Model 90 owners.

Their pride is a deeper thing. It has developed through weeks and months and years of wonderful personal experience with Model 90 cars, under the trying conditions of every day's demands.

To really know how well a car can be built for so economical a price you must know Model 90.
