

NEWS AND NOTES.

Catarrh—A New Treatment.

Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh. Out of 200 patients treated during the past six months, fully ninety per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent. of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple, and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 King Street West, Toronto, Canada, and enclose stamp for their treatise on Catarrh.—*Montreal Star.*

Franklin Simmons offers for the statue of Longfellow, awarded him by the Statue Association, a seated figure with cloak thrown back on the chair, and the left leg covered. The left hand holds a roll of manuscript and the right hangs over the arm of the chair. The square at the head of State street, Boston, has been chosen for the monument.

It seems to be pretty well understood that children must be sick at times, we would say to all anxious mothers that Nestle's Milk Food is an excellent preventative of cholera infantum, and all such complaints so common to children.

By the way—Milestones.

WANTED
By a Clergyman in full orders, sole charge, locum tenens, or curacy. Address, "CLERICUS," Hull, Province of Quebec.

OUR NATIONAL FOODS.

While many professional men are taking a lively interest in the chemical constituents of food, with their physiological action on the one hand, and the nutritive wants of the system on the other, we are aware that many have not the time to devote to this interesting study, and, therefore, would call their attention to the unqualified and universal testimony in favor of the foods made by Fish & Ireland, Lachute. The Medical Press, Medical men, the Secular and Religious Press, and others of the highest authority in Canada, apparently, cannot say too much in favor of these specially prepared cereals. There is, perhaps, no article of diet ever placed upon the market that has received such a volume of disinterested commendation as "OUR NATIONAL FOODS." The following reasons may be assigned:—(1) They are—as represented—THOROUGHLY DESICCATED to the extent, that the first act of digestion is effected in them; the same as that which the saliva of the mouth and heat of the stomach has when raw cereal food, prepared in the old way, is eaten. (2) They are, as represented, in nutritive merit and hygienic properties, valuable in supplying the WASTES of the body, and while other foods may be the same in appearance or even more attractive to the eye, these foods alone stand UNRIVALED for pleasing the stomach, and adding strength and vitality to the system.
