

is situate, or the Secretary or Inspector, or the agent of the Board in the district, of the fact of the presence of such pest.

5. All persons having in their possession nursery stock, trees, plants, or fruit infested with any pest shall cause the same to be disinfected and cleansed, in accordance with these regulations, and no such infested nursery stock, trees, plants, or fruit shall be forwarded, distributed, or parted with until the same are so disinfected and cleansed, and a certificate thereof obtained.

6. All dealers, nurserymen, or persons importing, selling, or distributing nursery stock, plants, or fruit not grown in the Province, or selling or distributing nursery stock, plants, or fruit grown in a nursery, garden, or orchard for which no "clean certificate" is in force, or the agent of any such person, before distributing, offering for sale, or disposing of any articles as above mentioned, shall notify the member of the Board, his agent or representative, in whose district any such article is found, or the Secretary or Inspector of this Board, who shall inspect or cause to be inspected said nursery stock, trees, plants, or fruit, and if they are found to be free from pests, shall issue a certificate to the owner or person in charge, stating said articles appear free from pests.

7. All persons having in their possession boxes, crates, or other packages or wrappings in which nursery stock or fruit has been imported, shall have such boxes, crates, or other packages or wrappings destroyed by fire, or disinfected in accordance with the directions contained in these regulations, forthwith upon the removal of the original contents.

8. All persons shipping, sending, or delivering any fruit, fruit trees, scions, cuttings, or plants within the Province shall place upon or securely attach to each box, crate, or other package or parcel containing the same, a distinct mark, stamp, or label showing the name of the producer and shipper or sender, and the locality where grown.

METHODS OF DISINFECTION.

9. Nursery stock or any trees or plants infested by any pest shall, during the dormant season only, be disinfected by dipping in a solution prepared as follows:—Take three pounds of soap (whale oil or good home-made soap) three pounds sulphur, and one pound Gillet's concentrated lye, or lye of equal strength and purity, boil one hour in four gallons of water, add one gallon coal oil, then boil slowly twenty minutes and add twenty-five gallons of water. This preparation is more effective when lukewarm, and it should therefore be used at a temperature of about 100° Fahrenheit.

10. Where pests are found to exist during the growing season, while the trees are in leaf, spraying must be done and other remedies applied, as shall be recommended by, or under authority of, the Board from time to time, so
