

IF YOU WANT A BIG SALARY
YOU OWE IT TO YOURSELF TO WRITE
US A LETTER OR A POSTAL.

Don't you often wish you had a good position and a big salary? You see other men who have. Do you think they got them by wishing? Don't you feel if you had the chance you could do their work? Of course you could. Just say, "I'll do it," and you will. Get your pen. Write us a letter or postal. We will show you how.

YOU CAN EARN BIG MONEY. WE WILL START YOU FOR IT.

FIREMEN AND BRAKEMEN!
Earn from \$75 to \$150 per month.

With the rapid progress of railway building in Canada it takes only two or three years to be advanced to engineer or conductor, whose salaries are from \$90 to \$185 per month.

Our free booklet tells all about our system of teaching. When writing, state age, weight and height.

Champion Evaporator

How can you reasonably expect to receive good returns from out of date kettles and pans? Give your Maple grove a show by using a Champion Evaporator, and you will obtain the quickest and best returns for the time spent of any work done on your farm. This crop requires no fertilizing, plowing, seeding, harrowing, and comes at a time of the year when other farm work is not pressing. Made in 22 sizes.

BALE YOUR HAY WITH I. H. C. PULL POWER HAY PRESSES

UNQUESTIONABLY It pays any hay raiser to own an I. H. C. pull power hay press. Well baled hay brings the best price.

To sell hay at all in some markets—or to reach a market where you can get the best price—in most cases your hay *must* be baled. You can draw bigger loads of baled hay, thus saving in time, perhaps double time for teams and men.

Baled hay retains its nutrition and remains in first class condition longer than hay in the stack.

With your hay baled you can wait for the right market and get the best price because you can move it more quickly.

Other Advantages

Bale your own hay first, and also make extra profits baling your neighbor's hay. An I. H. C. one-horse press with two men and a boy will easily bale eight to ten tons per day under average conditions—uniform bales in size, neat and compact. The bale chamber is 14 by 18 inches.

The I. H. C. two-horse press under similar conditions will bale ten to twelve tons a day. Bale chambers are 14 by 18, 16 by 18, or 17 by 22 inches in size. Both I. H. C. presses will bale any kind of hay or straw including timothy, clover, alfalfa, wild hay, shredded fodder, pea vines, etc., etc., the capacity varying of course with the material being baled.

Especially Desirable Features

I. H. C. hay presses do first class work rapidly—require a very small force of men—are most convenient and simple to operate—require no experience—are easy on the horse or horses, having no pounding or uneven draft to worry or chafe the team.

The I. H. C. pull plunger is a great improvement over the ordinary plunger. These presses have large feed openings—perfect working roller rollers—are durable, simple and have efficient powers, operating on the compound lever principle, with no extra draft when pressure is greatest. Only 4-inch step-over for the horses and are full circle type, with constant stopping or jacking. There are two strokes of the plunger to one revolution of the screw. I. H. C. presses are made principally of steel and iron—are compact and strong for long service—not at all flimsy, although neat in design. Write nearest office for catalog and other information. Call on the local International agent and inspect these presses.
