

For Sure Shooting

UNFORTUNATE indeed is the crow, hawk, fox, weasel or ground hog that visits a farm where there is a Tobin Gun. It is absolutely reliable, and with proper care will last a lifetime. Light enough and simple enough for a boy to handle with safety. For solid satisfaction, insist on getting a

Tobin Simplex Gun

Made right here in Canada—every bit of it, from the muzzle to the butt plate—it leads all others, and we give you this added advantage; because we know what goes into the making of a Tobin Gun. We guarantee it with a positive "money-back" guarantee. It places us under an obligation to return you the full purchase price, if we cannot give you satisfaction in every way. Priced from \$20.00 to \$210.00. Let us send you our new catalogue. It contains information about the construction of good shot-guns that will interest you.

This Cylinder Shows Why The "EUREKA" Root Cutter

is the best on the market. See how it is designed. Grooved knives, with the grooves on one blade opposite the teeth on the next. Instead of slicing or pulping, the "Eureka" turns out roots in shreds—thin narrow strips—

suitable for any kind of feeding. The "Eureka" shreds from one to two bushels a minute, and turns so easily that a child can operate it.

In the "Eureka" the feed is kept free from dirt, the feeder bottom being made with iron rods, thus allowing all dirt to drop out before it can reach the shredding cylinder.

The sloping form of the cylinder makes the machine a self-cleaner. Write for catalogue which explains fully.

ONE GOOD OR EVERY FEATURE GOOD WHICH?

As long as a cream separator skims close, it is a good investment. But one good feature or a few good features do not make a separator that will skim close for any length of time.

A good separator is one in which the minor parts have been just as carefully designed and just as well made as the most important parts. A defect in a minor part will, by throwing the entire machine out of adjustment, offset all the perfection attained in any other part of the machine. In the

I H C Cream Harvesters Dairymaid and Bluebell

one feature does not overtop all others because the same I H C standard of quality in design, material, and workmanship is maintained throughout.

They are the only separators with dust-proof and milk-proof gears which are easily accessible. The frame is entirely protected from wear by phosphor bronze bushings. These separators have large shafts, bushings, and bearings; the flexible top-bearing is the strongest and most effective found in any separator. The patented dirt-arrester removes the finest particles of dirt from the milk before the milk is separated. I H C Cream Harvesters are made in two styles—Dairymaid, chain drive, and Bluebell, gear drive—each in four sizes.

The I H C local agent will be glad to let you examine one of these separators, or, write nearest branch house for catalogues and other information.
