

## The Farmers' Market

## WINNIPEG MARKET LETTER

Office of The Grain Growers' Grain Company Limited May 1, 1911

**Wheat.**—At the end of last week prices showed a gain of 3½c on May futures, 3½c on July and 6c on October. Saturday's closing prices were the high points for the week. The former tone in the markets was due to reports of winter wheat damage and unfavorable weather for seeding in spring wheat areas. Export business was quiet during the week, altho there was a demand for our cash wheat to fill boat space. The One Northern was mostly in demand, but there was no difficulty in selling any of the other grades, and offerings were generally light at the prices quoted. The probability of a general strike of elevator workers at Port William and Port Arthur presents a serious problem, coming just after the meeting of association with a large volume of business to be handled.

Oats—Prices remained within a narrow range throughout the week, and closed on Saturday 1/- higher for May, 1/- higher for July and 1/- higher for October. There was a fairly large volume of trading in futures, and the demand for cash oats was good. Two Canadas Western oats commanded a premium of 1/- to 1½ over May price.

Barley—Barley was in better demand with a consequent advance in prices of four cents over the prices of a week ago.

Fish prices were lower on Monday there was a break of about seven cents, and the market was active during the week, closing on Saturday 7½ below the previous Saturday.
