The great obstruction that was encountered from the first in these negotiations with France, was that the minimum rates of France ranged from five to ten per cent ad valorem, while the ad valorem rates of our present minimum tariff is approximately 45 per cent. The law, however, gives little latitude for negotiation and the tariff officers of the government are compelled to insist notwithstanding this great difference upon substantially minimum for minimum.

Hearing to Dissolve It Monday

VIOLATION OF LAW

Guiding Principle of Argument of Department of Justice

WASHINGTON, D. C., March 9 .-"Either the Sherman act should be re-pealed or it should be enforced in a manner to make the people respect it." With this declaration of its guiding principle, the department of justice today, filed with the Supreme Court of the United States, a thousand-page brief in support of its petition that "Standard Oil" be dissolved as in vio-iation of the Sherman anti-trust law. The bill will be the foundation of the government's oral argument at the hearing of the case by the Supreme Court next Monday. It bears the names of Attorney General Wickersham and of Frank B. Kellogg, Charles

B. Morrison and Cordenio A. Sever-ance as special assistants.

One of the two thick volumes of the brief is devoted to an analysis of tes-timony taken in the Circuit Court of the United States for the eastern district of Missouri, which decreed that the Standard Oil Company be dissolved. It represents years of govern-mental investigation of the oil busi-

The government declares that this shows rebates and discriminatory rates received by the Standard Oil Company, not only during its formative period, but during the "last ten years," whereby the Standard was enabled to orling a large part of the concerns into the combination and to crash out and eliminate from the field of competition the principal part of the balance."

It is claimed by the government that it shows a system of lowering the prices, where competitors are doing POPE CONGRATULATES

The oft-repeated argument that this construction of the law prevents the formation of partnerships and the legitimate consolidation of business enterprise," says the government, "is fallacious, for the reason that such cor struction has no application where an bounds of legitimate combination or The United States has insisted from directly or substantially suppress comtion is a mere cloak to cover the intention of monopolizing commerce or for the purpose of using it as a weapon to stylke down competition, it is illegal. The brief answers the argument of the Standard Oll Company counsel that the corporations which entered into the organization in 1899 were not at that

time competing with each other.
"If they were not competing," says the government. 'It was because of an unlawful combination in the form of the trust, or during the liquidation period, because of the conspiracy of the individual stockholders. We have seen this trust was void.
