CURIOUS CONDENSIONS

Mr. Hiram S. Maxim, the inventor has given his American birthright for a British naturalization certificate.

It is asserted by authorities that Chicargo has more rats in proportion to its size than any other city on earth. A prize fighter is in his prime at from 20 to 26 years of age.

A Kansas City woman has brought suit for breach of promise of marriage against her divorced husband, who courted her for a second time. Since the foundation of the Legal

Aid Association in New York 90,000 people, victimized by their fellows have sought and found justice through its efforts.

Fewer pensions were granted to soldiers in the Spanish war than was expected, the number being 295. There are now 991,519 names of pensioners on the rolls.

Three places at least are known where green snow is found. One of these is near Mt. Hecla, Iceland; another 14 miles east of the mouth of the Obi, and the third near Quito, South America.

Whales' teeth form the coinage of the Fiji Islands. They are painted white and red, the red teeth being worth about 20 times as much as the white.

The sword Blades forged at Toledo by the Saracens could be coiled up like a clock spring and would resume perfect-straightness as soon as released.

It is now proposed to construct a canal connecting Germany with Euro-fean Turkey. The financial sleeps of the Kiel canal has given rise to this

In Buffalo a planer is in operation which at each cut removes a shaving full twelve inches wide from solid castiron. The knife is between twelve and thirteen inches wide. In 1877 the number of students at the

universities of Italy was under 9,000 This year it is nearly 26,000, or more in proportion to the population, than Germany or France can boast. The Glasgow Town Council has awarded a contract for electric trac-

tion engines to an American company solely on the ground of an earlier delivery than could be promised in Great Britain. The Salt Lake (Utah) Herald says that the Mormon church revenues from tithes alone are \$900,000 a year.

third of the amount being cash and two-thirds produce. An Italian company has asked the Pope's permission to put the vintage of the Vatican gardens into the market as "Leo Wine" at a high price. The Pope,

of course, refused his consent. People who are susceptible to the cold should make a point of wearing loose clothing in cold weather. Loose garments are always warmer than tight-fitting ones, not only because they allow room for circulation, but because they permit a layer of air between the

skin and the outside world. Ice skates can be changed into roller ekates by a Washington man's patent, compaising arms for attachment by bolts to the front and rear of the runner, with wheels journaled in the arms, the front wheel being carried by a head which permits it to turn like the front wheel of a bicycle.

The city of Lima and the city of Cordova, in the Argentine Republic, both claim the honor of having the first printing press in the New World, and

Electric capsules is one of the lates inventions. A combination of chemicals has been invented, which, according to the company that manufacturers a three-grain capsule of it, put into an ordinary battery cell, will yield enough electricity to run a 18-candle power incandescent light for one hour.

The garments of workers in powdmills are pocketless, so that they cannot carry knives or matches, or, inleed, anything, and are made of noninflammable material. No one is allowed to go about with trousers turned up at the bottom, because grit is collected in that way, and the merest hard speck & dangerous

Recently an automobile made the ascent of Mount Washington for the first time. The distance of ten miles from the Pinkham Notch to the summit was covered in two hours and ten minutes, which included delays in replenishing the water tank. This is less than half the time required by carriages drawn by horses.

The Manila Times says that a restaurant in that city which should be run on the American system and where one could get a decent meal without fear of being sickened by a mixture of flies, cockroaches, oil and other abominations, and for a reasonable price, ought to be a little gold mine to an enterprising man.

By staying away from the building yards women aid in the making of ships. No feminine visitors are allowed to go through the Cramp's yard in Philadelphia because every time a woman passes through the shops every one of the 7,000 workmen raises his eyes from his work, and in one minute one man's work for a fortnight is lost to his employers.

A Chicago man who wanted some money to pay his workmen on Satur-day night found he had no paper on which to write a check. He wrote a check on a shingle using a big marking pencil, and the check was cashed

At a recent flower show in Englance some sweet pea vines were exhibited which were grown from seed taken from the tomb of an Egyptian mum-my buried some 2,000 years ago. The blossoms were of a delicate pink and white and were less than the ordinary

Solstoi is an enthusiastic cyclist. He declares that he has to thank his bicycle and his vegetarian diet for the robust health which he still enjoys at the age of seventy. Twenty years ago a celebrated Russian physician solvised Tolstoi to avoid too much muscular exercise, but the patient was obstinate, and did exactly the contrary. He has ever been a lover of sports and re-

SIENCE NOTES.

The statue of Von Helomboltz by Herter is completed. It will be placed in the court of the University at Berlin between the statues of the two Hum-

Vienna has begun the construction of bicycle paths through the streets. Ground has been conceded for the purpose of building a new street on condition that a strip be prepared for the use of bicyclists.

A young French artist is the discoverer of a fine and genuine example of the Spanish painter Velasquez. The canvas was found on a recent tour to Spain. It is a life size portrait of a man and is in the best style of the master. It has been submitted to eminent critics who have pronounced upon its

genuineness The city councilors of Ulm, Garmany, have decided to utilize the spire of their magnificant call and a sala met-eorological observatory. The spire is one of the highest building in the world. The instruments vi'l be supplied by the Royal Gheervatory at Stuttgart, and the registrations will be made by the watchmen of the cathedral under the directions of Dr. Schimpf, a meteorologist. Next to the Eiffel Tower in Paris, the cathedral spire of Ulm will be the tighest artificial post of meteorological observation in the world.

Letters have recently appeared in The London Lancet, in reference to the colors of newly born negro children. Several medical men, have given the result of their experiments, and the evidence shows that the c. ll. en are of the color of a light quadroon. It is recorded, in a paper published in The Journal of the Anthropo'ogical Institute, of the natives of the Warri district of the Niger Coast Protectorate, that when pure negroes are born they are pink like young rats, but at the end of three or four months they become black. From this it would seem that atmospheric conditions seem to be necessary to produce the full black

The Park Department of Boston has for a long time thought that parks were something more than simply inclosures where citizens and their children could walk dressed up in their best and look at the grass and trees. Playgrounds have been provided in different parts of the city and in these the children can play in the sand and make mud pies to their hearts' content, while older ones have outdoor gymnastums and ball grounds to attract them from the sickening and vicious life of the pavements. The idea is an excellent one, as it is a one-sided policy to neglect a child's physical development while spending large sums upon the equipment and maintaining of schools for its mental training.

Four submarine mines broke away from Castle Island and floated on the beach at Marine Park, at South Boston, Mass. For a time it was thought they were floating Carrels, but when their real nature was discovered they were taken to a place where there would be no danger of premature explosions. It appears that the mines had been anchored in a little cove at the southerly end of Castle Island. They were placed there in order that they might be exploded as soon as the weather permitted. The storm was sufficient, however, to sever the mooring lines which held them together as a group, accounted for their going adrift.

A very curious case of telegraphic disturbance is reported from Utah, where the Oregon short line lost six telegraph wires for a distance of eighty miles north of Ogden, Utah. It was found on inspection that the cross arms and insulators were heavily coated with salt varying from one-sixteenth to a quarter of an inch in thickness. This coating, when wet, taken in connection with the snow lying on the cross arms, formed a dead cross. During the middle of the day, when the sun was shining brightly, the salt appeared to dry out and the wires could be used to some extent. When the cause of the trouble was determined, an engine was started out equipped with large hose which was used with not water for washing off the coning. The salt was carried by the winds blowing over the Great Sal: Lake, and as salt is a conductor of electricity, the short circuiting of wires is easily explained.

LITTLE ENCYCLOPEDIA.

There are 4,500 women printers in England.

Americans pay \$8,000,000 a year for looking glasses. The Chinese have a special god for

every disease. World's annual coffee production is 1,600,000,000 pounds.

There are 600,000 people employed in Italy in rearing silkworms.

The number of medical periodicals published in the United States is 275. London enjoys a greater area of open spaces than any other capital in the

The University of Oxford has type and appliances for printing in 150 different languages. Thirty years ago there were only two lozen explosive compounds known to

chemists; and there are over 1,000. It is said that the peasant of the south of France spends on food for a family of five an average of two pence a day.

It is computed that the present time the diamonds bought for American beauties living in the United States are worth no less than \$5,000,000.

The first use of Niagara's power was pade in 1725, a primitive sawmill being operated. Nothing more was done until 1842 when Augustus Porter conceived the plan of hydraulic canals and in 194) one of them was completed.

ness in the distinctly feminine organs, bad complexion and loss of flesh are forerunners of final collapse. Dr. Pierce's Favorite Prescription is a specific for weak women. It cures. In a great majority of cases the patient can treat herself at home, and obnoxious local examinations can be avoided. In a few bad cases it is wise for the sufferers to write to Dr. R. V. Pierce himself, at Buffalo, N. Y., and he will give full advice by mail free. He is consulted daily by great numbers of women throughout the world, and his advice is founded upon wide-spread experience. All correspondence is treated by him as sacredly confidential. His "Favorite Prescription" is non-alcoholic, and does not create a craving for strong drink. It contains no opium or other narcotic. It is perfectly harmless in any condition of the system. No medicine is equal to it in any respect for diseases of women. Therefore, accept no substitute for this world-famed remedy, though it be urged upon you as being "just as good."

Mrs. Mary E. Jones, of 520 Madison Avenue, Nevilent Mich. writes. "I was troubled with

"just as good."

Mrs. Mary E. Jones, of Sp. Madison Avenue, Ypsilanti, Mich., writes: "I was troubled with female weakness, and after taking three bottles of Dr. Pierce's Favorite Prescription I am free from pains. I had suffered for two years, when I began taking your medicine. I could not walk across my rosom without suffering dreadful pains. Now I do all my housework and walk where I nears."

Constipation and biliousness are radi-cally cured by Dr. Pierce's Pleasant Pellets. They don't gripe; they never fail.

A Rumor got About in a Village in hussia

That a Corpse of a Woman, who had Recently been Buried, had Turned in the Coffin

A rumor got about in a vinage 18 Russia, not far from the German frontier, that the corpse of a woman who had recently been buried had turned in the coffin. Everybody in the village not only believed the rumor, but ascribed the prevailing drought as the cause. A village council was held, and it was decided that the husband of the woman should have the coffin opened and the body replaced in its original position. The husband, however, promptly refused, and nothing could persuade him to yield to the unanimous wish of his fellow villagers, whereupon the latter took the matter in their own hands and went to the churchyard to dig up and open the coffin. To their great surprise the body lay in its original position. Their astonishment was not lessened when the legal authorities appeared on the scene and opened an inquiry, with a view of imposing punishment for the desecration of the grave,

The whole neighborhood was possessed with the idea that newly buried persons were to blame for the prevalence of the dry weather, for in anoth er village, not far off, a grave was opened and the coffin unscrewed to pour water on the corpse. The benighted peasants of this village were of the opinion that this was the best way to induce the clerk of the weather to supply them with much needed rain.

A GOOD SCHEME.

"We keep three servant girls," said Mr. Newly-wed. "One coming, one
