a k Line's Latest Report of the Prob able rarvest is Favorable for the Farmers of Europe.

London, July 8.-The Mark Lane Ex-

London, July 8.—The Mark Lane Express to-day in its weekly crop report says it is doubtful if the recent rains will effect greater "transformation scenes" in the wheat crop of England. It thinks the yield may reach an average of 28 1-4 bushels per acre.

The Express considers that the enhanced price and big weekly market in Paris furnishes evidence that the French farmers consider the government estimate as being quite 10 per cent, too high. The agricultural press puts the yield as 35,000,000 quarters, 4,000,000 quarters below the government estimate. ment estimate.

Spain is reaping a magnificent harvest, estimated at 12,500,000 quarters. The Italian harvest promises to reach the full average, and the Roumanian harvest is estimated at 9,000,000 quarters, leaving 3,000,000 available for

The spring wheat in Russia is less promising. In several provinces the winter crop, however, is splendid ac-cording to the moderate standard prevailing. The rye will make an excel-lent harvest. The other autumn-sown crops are all above the average, but the spring barley and oats are below

Buffalo lacks accommodation for guests visiting the Pan-American Exguests visiting the Fan-American Exposition. The statement is utterly
without foundation. It has been a
