THE CITY WATER SUPPLY.

During the past few weeks, especially before the new turbine pumps were started, a great demand has been made upon the city water supply by the new J. Y. Griffin & Co. packing plant in the east end of the city. For a time the water used at the plant has greatly lessened the water pressure which was very low until the new pump was starte. The management of the packing plant have now written the civic authorities suggesting that some means of communication be placele between their boiler room and the fire halls in orer that a signal may be given them in case of fire when they will use only absolutely necessary water. They suggest the nse of a coe which might be utilized also in case of fire at the packing plant.
