C. F. HAYES, Business Manager.

THURSDAY, JULY 14, 1910.

THE MANITOBA ELECTIONS.

It is not often in Canada that a man who has led his party from the wilderness of opposition to the treasury benches, and has succeeded in keeping it there long enough to get the party policy well under way and consolidate the government in power, goes down to defeat until age or disease has depleted his powers and forced him to relegate the practical management of things to other hands.

THE TIME TO ADVERTISE.

The articles which have been appearing in these columns since the past week depict a crop prospect of which our people may well be proud and for which they should be thankful. The articles have not been founded on hearsay. They have been written by a member of the Bulletin staff who has been seen throughout parts of the country north and west of the city—and who will continue his investigations until the whole district has been thoroughly covered.

THE ROAD TO GRAND PRAIRIE.

With very commendable enterprise the settlers on Grand Prairie have contributed a considerable sum of money and the equivalent of a further sum in labor for the purpose of constructing a wagon road from their district to some adjacent district. They are applying to the Provincial Government for assistance in the project. Their preference is said to be for a road leading directly to Edmonton, but it is impracticable on account of the expense they would devote to the time and money required to a road leading to whatever railway point is easiest reached.

WEST OF ENGLAND DAY.

New Organization Being Formed to Promote Immigration. Toronto, July 11.—All over Canada the West of England men are getting together in a movement that promises to turn their love for the Old Land into a more effective Canadian propaganda than has ever been attempted by British people in the Dominion.

SKIN OF THE EVER.

The skin which now hangs in the shop of Wolfe & Hine is the largest ever shot of a moose. It was shot in the vicinity of Port Smith, on Slave Lake, Athabasca. The moose was shot in 1880 by an old bull shot in 1880. It weighed 2,100 pounds, less than the specimen of which was shot in the north by permission of the government.

HITCHMER BROS.
