45c. and 65c.

Beautiful quality Fabric Gloves, in assorted shades, Beaver and Greys.

90c. pair.

STEER BROS.

When boiling a fresh tongue add a little salt and a small red pepper. Serve sliced pineapple and cucumber salad with cold sliced tongue. When trying raw potatoes add one or two chopped onions for flavor. The white of egg should be beaten separately when making an egg-nog. A few chopped nuts or a little grated coconut is nice sprinkled over a meringue. If there are flower-pot stains on your window sills use wood ashes to remove them. Paint spots on glass can be removed by rubbing with a cloth dipped in hot vinegar. Look out for the Independent. July 13th

Far and Near.

A story of passion, treason and crime, the degradation of a young naval officer who, fifteen years ago, betrayed his country in order to obtain money for a woman of whom he was enamored, is recalled by the release from his prison in Devil's Island of the unfortunate man. La Belle Lison was the name of the woman who fascinated young Ulmo in the early years of his career at Toulon. The son of a wealthy industrialist at Lyons, from whom he received a handsome allowance to supplement his pay, Ulmo was carried by his poorer comrades. But La Belle Lison had expensive tastes. To satisfy them the young officer was soon reduced to borrowing and then to other more diabolical means of procuring money. Employed in a naval department office where he had access to importation documents, he succumbed to temptation and began to sell secrets to foreign agents. He even endeavored to sell to his own Government forged documents purporting to be information relative to a foreign power's military plans. Suspicious were raised and the French authorities laid a trap for Ulmo. He has been released from prison and given comparative freedom—in the scorched lands of Bayenna, or French Guiana, where he will drag out the remainder of his miserable existence.

A mysterious epidemic is raging among the horses in Scotland. Much alarm is felt from Forfarshire north to Ross-shire, at the havoc being wrought amongst horses by a deadly and mysterious disease known as grass sickness. About 50 valuable animals have died and several farmers have each lost two horses. Suffering animals have been destroyed for experimental purposes. The disease is of a virulent type, and is spreading rapidly.

Raids by lions in the Barberton district, north of Swaziland, South Africa, are causing a great deal of alarm among the farmers and white settlers. Large numbers of pedigree cattle are reported to have been killed by the beasts. One lion, a huge beast, was shot by a young white girl from the veranda of her house, where she was keeping watch while her father had gone out into the bush to bring in his stock.

Only a common hound, but he fought a maddened bull to save his eight-year-old master's life and won. The boy was resting under a tree in a field near Sunbury, Pa., when the infuriated bull saw him. The animal charged and tossed him high into the air. One horn sank into the child's arm. The boy screamed with pain as the animal dragged him across the field, but no one heard except the little dog. The pup was game, but cautious too, and opened his attack from the rear. He sank his teeth into the bull's hind leg and hung on despite violent kicks. The bull released the little lad to deal with the new annoyance and the hound let go. That was his strategy. Snapping and snarling, he backed away from the charging bull, dodging and leading the animal away from the boy. The little victim crawled away under the fence and the pup at once gave up the fight. With a final snarl, he dashed away after his master, wagging his tail proudly.

10,000,000 illiterates there are in the United States according to the Chairman of the United States Illiteracy Commission. A careful census in which every individual be put to the test of reading simple paragraphs and writing simple sentences, would show there are approximately 10,000,000 illiterates in the United States and almost as many near-illiterates, delegates to the National Education Association's convention were told by the Chairman. "In the most illiterate sections," she asserted, "conditions approach the barbaric, marriage has no sanctity and commerce is carried on through barter and trade."

Lynchings in the United States in the first six months of 1923 dropped to eleven compared with thirty-three for the same period in 1922, the National Association for the Advancement of Colored People has announced. The decrease was attributed to agitation for a Federal anti-lynching law, to the northward migration of negroes and the consequent desire to retain negro labor in the South. Florida had three lynchings, Georgia two, and Arkansas, Alabama, Louisiana, Mississippi, Missouri and Texas one each.

New aeroplane records and feats are being performed almost daily. The latest feat is that of Lieut. Hines, and Seifert who re-fueled an aeroplane in flight, at San Diego, when Lieut. Richter and Capt. L. Smith went after a new world's endurance record. Rushing through the air at 90 miles an hour, Lieut. Hines and Seifert guided their craft above that flown by Capt. Smith and Lieut. Richter, ran down a 40-foot steel wire-encased rubber hose and within two minutes the feat was a matter of history. The quartette of officers many times the practice had succeeded in getting the pipe from one plane to another, but never before had the gasoline been sent from one plane to another. Had a few drops of the fuel scattered over the hot exhaust pipes it would have spelled disaster for at least one of the planes. It required expert jockeying on the part of

Justice is Always Pictured AS A WOMAN

Here two women fought the city's king of evil. One was charmed by her innocence, though scorned by the mother who should have protected her. The other, made strong in her knowledge, brought justice when the hands of the Law were stayed.

"The Night Rose"

GOLDWIN PRESENTS LEROY SCOTT'S

DIRECTED BY WALLACE WORSLEY.

Fear made her a creature of the night, but her innocence and her faith made her the instrument of justice. It is a strong, pulsing story of a big city of to-day—of people you know—a triumph of right, a victory for good over evil.

THURSDAY—Big Local Attraction: MAJOR F. SIDNEY COTTON'S AERIAL SURVEY OF THE FROZEN NORTH, APRIL, 1922. SCENES OF THE LABRADOR GOLD DISTRICT AND TIMBER AREAS.

the pilots to get the two planes, 35 feet from wing tip to tip, together, and then throttle down so that the hose could be caught and fastened to the tank. Preliminary re-fueling in the test developed one fault that was remedied quickly: That was the inability of the fueling plane pilots to haul the hose back into the fuselage. The rush of wind under the plane caused the heavy hose to whip around like a piece of string, and Lieut. Seifert was compelled to make a landing with the forty-foot hose dangling under his machine.

The largest floating dock in the world, surrendered by Germany under the peace treaty, is being prepared at Chatham for special naval work. In service circles it is stated on reliable authority that the dock is intended for the new naval base at Singapore. Before the dock was surrendered three sections of the structure were rendered useless by the Germans, and at Chatham Dockyard 800 men are now at work on the building of new sections.

Each of these sections will be 180 feet long, 85 feet in width and over 100 feet high. The work is the most important of its kind yet undertaken at Chatham Dockyard. The total wages bill will amount to more than \$400,000. In connection with the building of the new sections a system of payment by results has been instituted, and it promises to be distinctly successful. It is hoped that the first of the new sections will be launched by next autumn. When the new sections have been added the dock will be capable of receiving the largest battleship at present afloat, or the Nelson or Rodney, now building. The value of such a dock at Singapore would be incalculable. The greater part of the dock lies in the Medway, near Chatham. After the armistice it was towed in sections across the North Sea from Germany.

BURMAN'S GREAT OIL WELL

Home again after three years of geological investigation of oil fields in India, Dr. B. R. Mackay, of Cornwall, Ont., formerly of the geological sur-

vey branch of the Dominion Government, was a passenger on board the S.S. Empress of Canada, the new champion of the Pacific and the holder of the blue ribbon for her record trip from Yokohama to Vancouver, made in 8 days, 10 hours and 55 minutes at an average speed of 20.8 knots per hour. Dr. Mackay and five other members of the Dominion geological service, were engaged by Lord Cowdray in April, 1920, to proceed to India and investigate the oil formations. In Burma, which he said, was the chief producer of oil in the British Empire, all the producing wells were on one area three quarters of a mile square. There were no fewer than 4,000 wells on this tract and all the upper structures gave the area the appearance of a dense forest.

The race for oil, he said, was still a tremendous international competition. In India only British countries could operate, so that Lord Cowdray has not hesitated to spend large sums in seeking to develop this field. Speaking of political conditions, Dr.

Mackay stated that the unrest was greatly exaggerated in the foreign press. "There is nothing wrong in India," he said. "Once the Government showed a firm hand in putting down Ghandi and his followers, the whole thing collapsed."

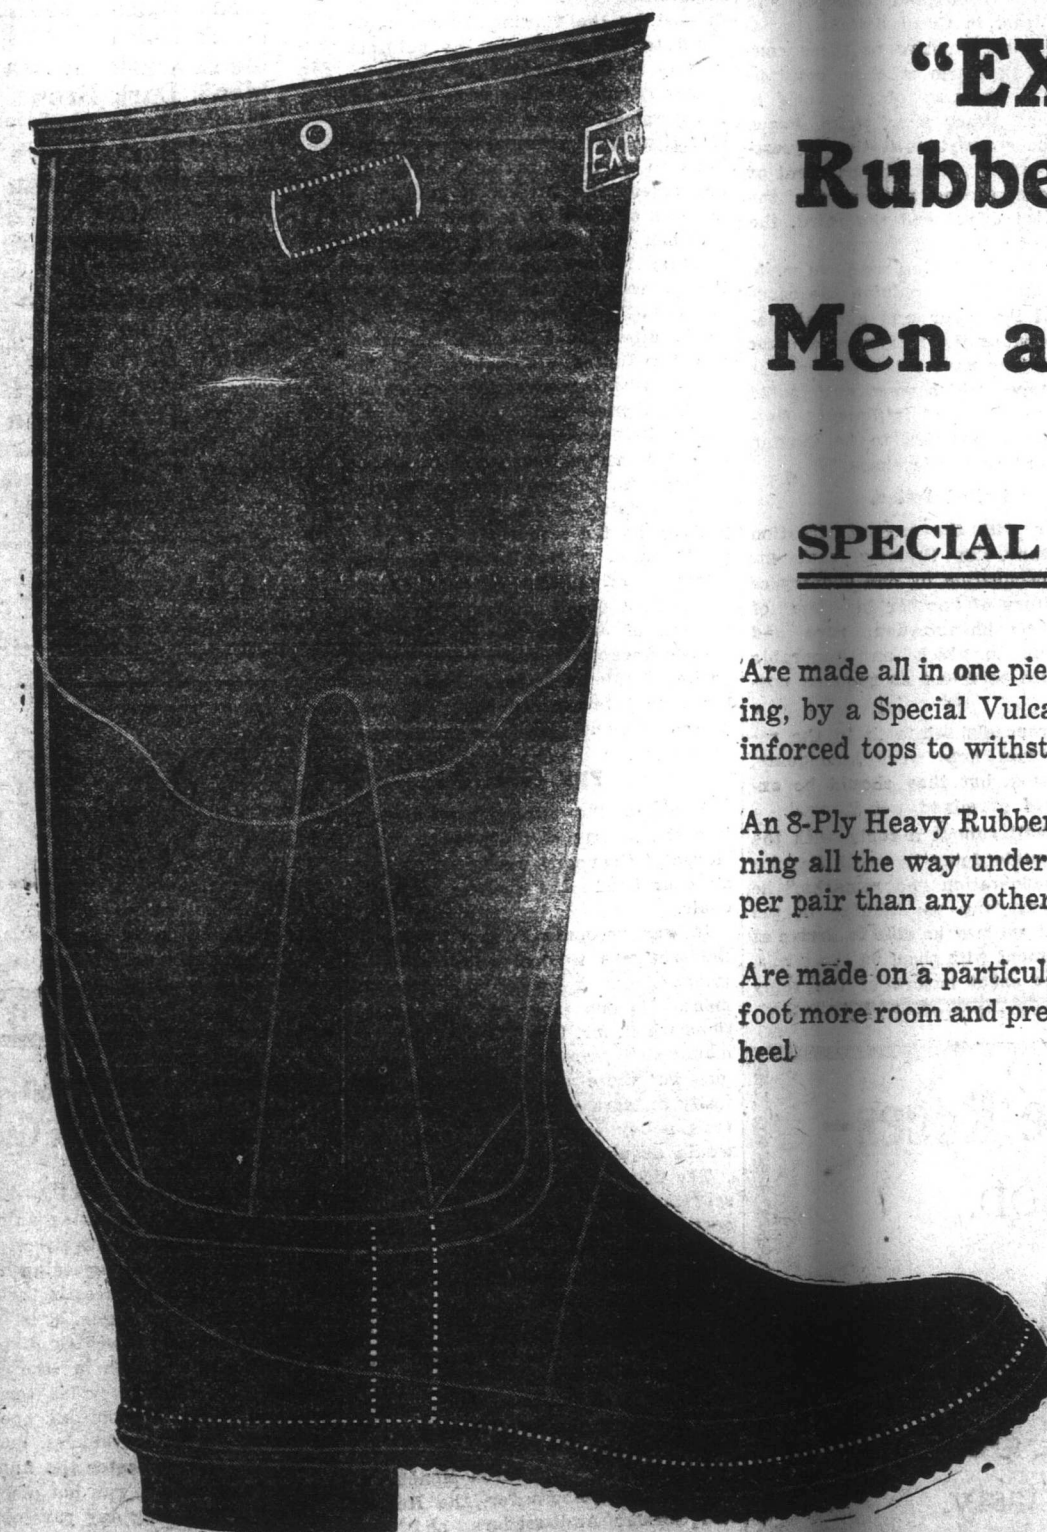

The Five Mile Race on St. Bon's College Campus will start at 8 p.m. sharp on Monday evening. Contestants are requested to be present at 7.45. The grounds will open to the public at 7.30. Gate 10c. Proceeds in aid of Belvedere Orphanage.—jy23,21

SWAT THAT FLY.

Two little flies in my office I see. I have killed one, and now there are three; Seven little flies buzzing early and late. I have killed six and now there are eight. Eight little flies all impatient to dine. I have killed seven and now there are nine—million.

"EXCEL" RUBBER BOOTS!

"THE FISHERMEN'S FRIEND"

"EXCEL" Rubber Boots for Men and Boys

SPECIAL FEATURES:

Are made all in one piece to prevent ripping or cracking, by a Special Vulcanizing process. Specially reinforced tops to withstand chafing or cracking.

An 8-Ply Heavy Rubber Sole with extension edge, running all the way under the heel. Insures more wear per pair than any other make of Boot on the market.

Are made on a particular shape of last, which give the foot more room and prevents slipping at the instep and heel.

A heavy Cloth insole made under a new process which absorbs all moisture, is nicely fitted in to add extra comfort for the wearer.

A 4-Ply Duck lining is also used, treated specially to keep the foot and leg cool during hot weather.
