Yesterday, The Advertiser's special correspondent at Montreal sent the news of the letting of the contract for the new car shops in this city. This telegraphs these particulars:

"Geo, E. Mills, of this city, a prominent contractor, who has obtained the bulk tender for the G. T. R. shops at London, put his figures at over \$100,000. The sub-contractors are all Hamilton men. Donaldson & Patterson have the woodwork, Irwin & Son the slate work and rooting; H. S. Wallace the plumbing, and Ross Bros. the painting and decorating. Contractor Mills is known among builders as a hustler, and is undoubtedly a very competent man. He will begin the London work without delay, and it is expected that the shops will be running at full capacity by next sum-

—The Wilbur Opera Company played the ever popular "Bohemian Girl" to a fair-sized audience last night. In But this apparent misfortune has been the cast Miss Eloise Mortimer apturned to good account, for by exhibiting the damaged rigs, the quality of stock used is shown in a way that can leave no doubt as to its merit. There is also a photo taken of the scene at Breslau showing the wreck. The firm have a fine display, consisting of painted and natural wood Mikados, standard buggies, a Chamberlain trap, a light three-quarter-end spring buggy, a light New York road wagon (a new type here, but largely used in the United States), a canopy top Surrey, and a full line of the new style of cutters-1896 and 1897. This firm started in business on a very small scale 35 years ago, but their motto has always been "One grade only, and that the best," and to the fact that they have lived up to that motto may be attributed their success. With the new addition that has just been built their factory is claimed

to be the largest in Canada. An article that is attracting a great

deal of attention is that of the National Washing Machine, which can be seen daily upstairs in the main building. This machine commands merit, having been awarded certificates of honor at the International Exhibition, Jamaica, and World's Fair, Chicago. Those interested should not fail to see it. Mr. L. M. Lent, patentee, of Ridgetown, is in charge.

Backing Down on the Attack on Lord Aberdeen,

No Straight Opposition Motion to Be Put Before the House.

Special Telegram to The Advertiser. Ottawa, Sept. 15.—The Opposition were in caucus this morning for an hour and a half. The principal matter discussed was the Aberdeen-Tupper correspondence. It was decided no to put a straight motion on the matter, but to discuss the question on another motion. It was also agreed that Parliament might prorogue about the end of next week or the 1st of October at the latest. Mr. La-

riviere occupied the chair. The debates committee, which had the case of Vanasse-MacLeod, Bou-chard and Laselle, before it, is preparing a report to recommend the dismissal of all four for being active political partisans. The only case in doubt is Laselle's. He denied he was secretary of the committee to revise the voters' lists. This morning copies of circulars and letters sent out by Laselle, with his name attached, were received, making conclusive evidence against him. The committee met and adopted its report, but owing to the Conservative caucus, it adjourned without doing any business.

A Drunken Man's Terrific Drop-Escaped Unhurt.

Cleveland, O., Sept. 15.-Wm. Bishop, a sailor, 40 years old, whose home is in Ogdensburg, N. Y., jumped or fell from the Superior street viaduct to the Cuyahoga River, a distance of 81 feet, yesterday, and struck the water feet first. He was intoxicated. The passage through the air and contact with the water sobered him, and he began to swim to the bank, when the crew of a fire boat fished him out of the water.

RUPTURE Mr. B. Lindman, of Toronto, manufacturer and proprietor of the celebratparts of five rigs taken from a car- ed Wilkinson Truss, will be at the Gustin House, 368 Dundas street, all this week, for the purpose of fitting those suffering from hernia or rupture. The excellence and simplicity of the Wilkinson Truss are well known, being most highly indorsed by those wearing them or having used from the Atlantic to the Pacific, as elso by every physician and surgeon in Toronto, without exception. You have no doubt, noticed the temporary relief and the ease with which the runture may be reduced and retained for a time by the fingers; the action of the Wilkinson Truss is similar to that of the human hand, not only reducing but fully retaining the rupture. It has ro complex attachments, it is simple, it is perfect. Mr. Lindman will be glad to see you at the Gustin House, Dundas street, every day this week. Suc cess attends the Wilkinson Truss ev erywhere. Unfortunately there are so many more or less worthless trusses in the market that confidence in truss es has been lost by many. But this is the age of progress, and we can assure those requiring a perfect truss that this is the truss par excellence.

Geld From British Columbia. Huge chunks of gold-bearing rocks

from 20 different mines in the Ross-land Mining District, B. C., form an exhibit of the greatest interest in these days, by reason of the recent discoveries in British Columbia which indicate that Canada will in a short time add millions to the world's supply of gold. The exhibit at the Western Fair is in charge of Messrs. Flood & Lindsay, of this city, representing A. W. Ross & Co., mining brokers, of Toronto, and are good, generous samples of the gold ore, some of the rocks weighing 400 pounds. They show quite plainly the different formation of rock in the different mines. There is also a large sample of the capping which covers the gold-bearing veins. It is greenstone, impregnated with pyritic and white iron. The ore is a massive mixture of copper and iron sulphide, and carries from one to three ounces in gold, 3 to 10 per cent copper, and a small varying amount of silver, usually less than 10 ounces, to the ton. In addition to the rock exhibits, there are some photos of parts of the mining district. There is one view of Rossland, the central town of the district, and apparently quite a desirable place to live. This town grew in less than a year from a straggling hamlet of a dozen log cabins to a prosperous town of 4,000 inhabitants, with an electric light plant, and a waterworks system. It is now noted for its quietness and respect for the laws, forming a striking contrast to the typical mining camp of the "Wild and Woolly West." The exhibit is certainly worthy the interest it excites.
