TRAINS FROM EAST **DELAYED BY SNOW**

Some Three Hours Late From Montreal.

Heavy snowfall to the east was responsible for the C. P. R. train from Montreal being later today than it has been before this winter. It was scheduled to arrive here at 11:20, but was not expected to pull into the Richmond street depot until nearly 12:30, being over three hours behind time. Trains from the east on the G. T. R. were also late, but the one from Montreal was due to arrive in the city only about 40 minutes behind time this afternoon. The snowfall east of Toronto last night was much heavier than it was here, and train operation between Mon-treal and Toronto were delayed considerably. The main line of both Grand

Trunk and C. P. R. were kept open, but the trains proceeded only slowly, in some instances behind the plows.

Officials of the C. P. R. report heavy showfall about Goderich, which has been causing great difficulties during the past few days. Plows have been working between Goderich and Guelph on the C. P. R., and trains have been
