JAMES EPPS & CO.,

LOERATED

IT LEADS TO DANGEROUS DISEASES

DISEASE. LARYNX.

SIGNS OF THE DISEASE.

All the symptoms given below, as well as others which have been previously stated and which it is not necessary here to repeat, are common to this disease in some of its stages or complications: yet thousands of cases annually terminate in consumption or chronic bronchitis, and end in the grave, without ever having manifested one-half of the symptoms here enumerated. SYMPTOMS OF Dull, heavy headache through the temples and above the eyes; indisposition to exercise; difficulty of thinking or reasoning, or concentrating the mind upon any subject; has situde; indifference respecting business, lack of ambition or energy; obstruction of masal passages; discharges voluntarily falling into the throat, profuse, watery, acrid, thick and tenacious, mucous, purulent, muco-purulent, bloody, concrete blood and pus, putrile, diffensive, etc. In others, a dryness of the nasal passages; dry, watery, weak, or inflamed eyes, ringing in the ears, dearness, discharge from the ears, hawking and coughing to clear the throat, ulcerations, death and decay of bones, expectoration of putrid matter, specuke of bones, seabs from ulcers leaving surface raw, constant desire to clear the nose and taroat, voice altered, nasal twang, offensive breath, impuirment or total deprivation of the sense of smell and taste, dizziness, mental depression, loss of appatite, nausea, indigestion, dyspepsia, enlarged tonsils, raw throat, tickling cough, difficulty in speaking plainly, general debility, idiocy, and insanity.

Any thing which debilitates the system, or Any thing which debilitates the system, or diminishes its powers of evolving animal heat and withstanding cold or sudden changes of atmospheric temperature, and other discusse producing agencies, renders the individual thus enfeebled very liable to catarrh. Among the most common debilitating agencies are a scrottlous condition of the system, or other impurities of the blood, exhaustive fevers, and other prostrating acute discusses, or those badly treated; exhaustive and unnatural discharges, intemperance, excessive study, adversity, grief, want of sleep, scrotulous and other taints of the system, which may have been inherited, having perhaps been handed down, even unto

IN CHARACTER. fasten itself upon them. They may not seel any great weakness, may not have any pinpels, blotches, eruptions, swellings, or illeers, upon their whole person; in fact, nothing about them that would, except to the skilled eye of the practical and experience of physician, indicate that their systems are weakened or deranged with bad humors; and yet such a fault may, and generally does, exist. As an illeer upon the leg, or a "lever-sore," or an eruption upon the skin, may be the only outward sign of a fault in the system, so, frequently chronic catarri is the only sign by which a bad condition of the system manifests itself in a manner that is perceptible to the sufferer himself, or to the non-professional observer. The finely-skilled physician, whose constant practice makes his perceptive faculties perfect in this direction, would detect the constitutional fault, as an experienced banker detects a finely-executed and dangerous banknots which the unpracticed eye would pronounce genuine.

COMMON SENSE TREATMENT .- Guaranteed Cure.

If you would remove an evil, strike at its root. As the predisposing or real cause of catarrh is, in the majority of cases, some weakness, impurity, or otherwise faulty condition of the system, in attempting to cure the disease our chief aim must be directed to the removal of that cause. The more we see of this odious disease, and we treat successfully thousands of cases annually at the Invalids' Hotel and Surgical Institute, the more do we realize the importance of combining with the use of a local, soothing and healing application, a thorough and persistent internal use of blood-cleaning and tonic medicines.

As a local application for healing the diseased condition in the head, Dr. Sage's Cutarrh Remedy is beyond all comparison the best preparation ever invented. It is mild and pleasant to use, producing no smarting or caustic drug, or other poison. Its ingredients are simple, and harmless, yet when scientifically and skillfully combined, in just the right proportions, they form a most wonderful and valuable healing fredience. Like gunpowder, which is formed of a combination of saltpetre, sulphur, and charcoal, the ingredients are simple, but the product of their combination is wonderful in its effects. This Remedy is a powerful antiseptic, and speedily destroys all bad smell which accompanies so many cases of catarrh, thus affording great comfort to those who suffer from this disease. The reader's mind cannot be too strongly impressed with the importance of combining theorough constitutional with the local treatment of this disease. Not only will the cure be thus more surely, speedily, and permanently, effected, but you thereby guard against other forms of disease breaking out, as the result of human in the blood or constitutional derangements or weaknesses.

In curing catarrh and all the various diseases with which it is so frequently complicated, as throat, the local treatment of this disease. In continuous diseases with the docal continuous diseases with the disease of the color Medical Discovery upon the against other forms of disease breaking out, as the result of human in the blood or constitutional derangements or weaknesses.

In curing catarrh and all the various diseases with the local treatment of this disease. The effects of the Golden Medical Discovery and Dr. Sage's

CHIEF

In ouring catarrh and all the various diseases with which it is so frequently complicated, as throat, bronchial, and lung diseases, weak stomach, catarrhal deafness, weak or infiamed eyes, impure blood, scrofulous and other taints, the wonderful powers and virtues of Dr. fleroe's Golden Medical Discovery cannot be too strongly extended. It has, a specific effect upon the lining mucous membranes of the nasal and other air-passages, promoting the natural secretion of their follicles and glands, thereby softening the diseased and thickened membrane, and restoring it to its natural, thin, delicate, moist, healthy condition. As a blood-purifier, it is unsurpassed. As those diseases which complicate catarrh are diseases of the lining mucous mem-
