

## “Bryant Goods are Good Goods.”

In the manufacture of the BRYANT SOCKET the relation of the various parts is carefully studied. A heavy shell, the best grade of porcelain insulation, the finest of phosphor bronze and a solid key make a well balanced piece of mechanism, with a “snap” and “vim” which have made it the standard.

To complete it and make a perfectly balanced article, every key bears the name which carries with it our guarantee.

Our Trade Mark on every package.
