

The paper to-night is on "The economical handling of material by machinery," by Mr. J. A. W. Archer, manager of the Jeffrey Manufacturing Co., Toronto. The paper at the next meeting will be on "Railroad Signalling", by Mr. C. L. Hackett, of Montreal.

A good many of the members might think that this paper will not be of much interest to them, but it will not hurt anybody to hear a paper on Railroad Signalling, as it will give them an insight into the method of signalling on a railroad.

The next order of business is the announcement of new members.

NEW MEMBERS.

- Mr. R. Woodward, Boilermaker, G.T.R., Toronto.
- Mr. G. Dickson, Electrician, G.T.R., Toronto.
