The progress of the investigation into the affairs of the 13th of June has become less active, owing to some arrests recently made, and to the discovery of important correspondence. Pondence. There is a talk, also, of certain revelations, which will increase the numbers of the accused who are to figure befere the High Court of Justice.

Sergeant Rattier, the missing Montagnard representative, has escaped to England.

### From our English Files.

The Keys of Rome sent to the Pope.—Accounts from Rome state that General Oudinot had sent the keys of the city to the Pope. The tone of the Paris journals respecting the reception of the French at Rome is very contradictory. The Moniteur says that the declaration of the state of siege is an act of great tyramy on the part of Oudinot, or else it exhibits a necessity for his providing for the protection of his troops against the ill-feeling of the Romans; and we learn, by late accounts, that even the precaution taken has not been sufficient, as several of the French sentinels have been poignated in the dead of the night. The Debats extols the wisdom of the measure.

of Braceborough, experienced a loss of a singular nature—
on the premises at Braceborough for 60 years, and prior to
ing Street James's, for 40 years. The bird was consequently
skin stuffed and preserved as a relic of antiquity.

Thiers contemplates making a demonstration shortly in favour of the Ex-King of the French. It is said he will head a large number of the National Guard and members of the Legislative Assembly, who will ask leave of absence from their duties, and proceed to London en masse, and tender to the late Soverign the renewed expression of their homage.

CANAL.—We are glad to observe that this contemplated work is likely to be undertaken and completed, with the as-

sistance of our enterprising neighbours.

In accordance with the suggestions of the public meeting held last week, the Committee then appointed met the Deputation from Troy, at St. Johns, on Tuesday evening. Fo an account of their proceedings we are indebted to the Herald, which says:-

"The Montreal Deputation went out to St. Johns on Tuesday last. They were—Messrs. Young, DeWitt, Ostell, Desbarats, Thomas Ryan, and Jason C. Pierce. We un-Desbarats, Inomas Kyan, and Jason C. Fierce. We understand the place of meeting was the hospitable residence of the latter gentleman. The American Deputation, as will be seen, were all gentlemen of the first standing in society: Chancellor Walworth, of Saratoga; General Ross, of Essex; Messrs. C. H. Russell, New York; L. G. Cannon, Troy; J. H. Boyd, Whitehall; A. P. Edwards, New York; G. M. Davidson, Saratoga, Chairman of the Saratoga and White-hall Railway; J. S. Claxton, Cohoes; J. H. Jackson, Westport; A. H. Pierce, Troy; T. Bradley, Burlington, and W Chittenden, Burlington.

"A friendly conference took place on the business which brought the Deputation together, which was prolonged to nidnight; and the two Deputations adjourned till the next

"On Wednesday morning they again assembled, and seexpectant baronetcy, declared the gentleman out of given no notice of it.

The Tuam Herald narrates the following shocking in Ayoung many and the street of the country along the line of the Country along the line of the Country along the line of the Chambly Canal, and between the two waters, which are to be connected. This examination was a semiled, and separated into three parties, for the purpose of investigating the different routes proposed for the line of the Canal. Their inquiries were directed principally to the character of the ground at the two proposed termini on the St. Lawrence; but they also made a cursory inspection of the country along the line of the Chambly Canal, and between the two waters, which are to be connected. This examination was a semiled, and separated into three parties, for the purpose of investigating the different routes proposed for the line of the Canal. Their inquiries were directed principally to the character of the ground at the two proposed for the line of the Canal. Their inquiries were directed principally to the character of the ground at the two proposed for the line of the Canal. Their inquiries were directed principally to the character of the ground at the two proposed termini on the St. Lawrence; but they also made a cursory inspection of the country along the line of the Canal. the line of the Chambly Canat, and between the two waters, which are to be connected. This examination was but preliminary, and, as we have already said, of a very cursory character; it would, therefore, be improper at present to give any opinion as to the line which will be ultimately chosen. In order to fit the Deputations the better to decide that point, Mr. Claxton, who is an Engineer of considerable talent and approximate at all remains in Canada, and is to make a given experience, still remains in Canada, and is to make a survey of the country, as well to verify the previous survey of Mr. Mills, as to examine other roads than the one chosen by that A letter from Ballinrobe, published in the same journal, thains a similar disgusting narrative:

On Saturday last the churchyard of the Nearle parish, are this town, presented the awful and revolting spectation of the project, will be welcome. We congratuate this town, presented the awful and revolting spectation of the project, will be welcome. We congratuate the same power of the project, will be welcome. We congratuate the same power of the project, will be welcome. commencement of this new communication with our south-

> In addition to the above, we would add, that all parties desiring the prosperity of the city should use their influence to secure an impartial survey of the different lines of route proposed; and that, if it can be accomplished for the same expense, or even a trifle more, the line from Longueil to the Richelieu should be preferred, as being the best point of departure from the St. Lawrence, when considered in connection with the trade of Montreal as well seemed before here.

Mr. D. O'Connor, of the Neale, had the remains collected per quarter."

We were glad to learn that the Committee from the States were quite alive to the propriety of consulting the interests of the inhabitants of Montreal in this respect. It therefore rests with our citizens to demonstrate clearly the advantages were quite anverted, and reported the circumstances to the property of the inhabitants of Montreal in this respect. It therefore rests with our citizens to demonstrate clearly the advantages to be derived from its construction, not only as relates to the trade of the St. Lawrence, for the sake of which the Petitioners desire that such a duty and the Dutchess of Orleans the Carriage.

Were quite anverted, and reported the circumstances to the property of consulting the interests of the empire at large, while at the same time they are persuaded that no real necessity exists for endeavouring thus artificially to stimulate the trade of the St. Lawrence, for the sake of which the Petitioners desire that such a duty as I have mentioned should be imposed.

Looking to the remarkable natural advantages which in which trade Montreal has an important interest.

Our American friends candidly admit, that in the prosecution of this undertaking the interests of Montreal in this respect. It therefore rests with our citizens to demonstrate clearly the advantages to the trade from the Upper Lakes, but also from that which is expected to pass through it from the Eastward and Southward, in which trade Montreal has an important interest.

Our American friends candidly admit, that in the prosecution of this undertaking the interests of Montreal in this respect. It therefore rests with our citizens to demonstrate clearly the advantages to the trade from the Upper Lakes, but also from that which is expected to pass through it from the Eastward and Southward, in which trade Montreal has an important interest.

Our American friends candidly admit, that in the prosect.

Looking to the remarkable natural advantages which distinguish her rapidly increasing population, I can entertain no doubt that now that full scope will be given for the Eastward and Southward, in which trade Montreal has an important interest.

Our American release to the trade of the St. Lawrence for the sake of which the Petitioners desire that such a duty as I have me

the large cities of the Union have an eye to their own advan-tage in the construction of their Canals and Railways, and we ought not to be behind them in this respect.—Montreal

The Railroad to St. Hyacinthe seems to be the commencement of an undertaking which our friends of the metropolis consider will make their city the emporium of the West. Montreal and the Atlantic will then be connected; but they will be indebted to a neighbouring country for a right of passage through their territory, which may be closed up at the shortest notice, or without any at all. And in case of ceasing to be on friendly terms with the States, of what avail will this Railroad be for the purpose of communication with the ocean !- Quebec Mercury.

The Official Gazette contains a Proclama-

It gives us much pleasure to hear that the care and bowed, and said something, but an examination of the children of the Windsor Instance of the Orleans family were whirled away."

It gives us much pleasure to hear that the canada Glass Works of Messrs. Smith, Wilkins & Co., at this place, under the superintendance of Mr. Holman, which have been suspended for susp

# GREAT WESTERN RAILROAD.

To the Inhabitants of Canada. The Directors, considering the present a favourable opportunity to procure additional subscriptions to the capital stock of the Great Western Rail Road Company, have determined to make every possible effort to fill up the amount required in Canada, and other countries, with as little delay as the magnitude of the undertaking will permit, and with this

Shocking Profanity.— The Amherstand report of the Engineer, makes the Great Western Road certain to pay its proprietors better than almost any other known line, and were it not for the comparative infancy of the country through which it passes, and the consequent want of capital for such purposes, the undertaking would not have remained so long dormant.

The unfortunate agreement made with a company of gentlemen in London in 1845, and an act of Parliament secretain myilleges to said company, prevented the

gentlemen in London in 1845, and an act of Parliament se-curing certain privileges to said company, prevented the Directors making necessary exertions for the prosecution of the work during the past three years. This Act, however, has been repealed during the last sitting of the Legislature, and the Directors are now sanguine that after proper expla-nations of the favourable position of the Company are made in the United States and Great Britain, a constituency for IMPORTANT TO THE OWNERS OF TOWN OR VILLAGE LOTS.—By an Act passed at the late Session of the Legislature, "for the better provision respecting the survey of lands in this Province, it is required, that all owners, their heirs, or agents, shall, within one year after the passing of the Act, deposit in the Registry Office of the county, a plan or map of any Town or Village as surveyed and divided in lots, in the manner specified by the said Act, under penalty of fine, until the said plan or map is so deposited in the Registry Office.

In the United States and Great Britain, a constituency for med by such people as are seeking for safe and profitable investment may be obtained. To insure this, however, it is absolutely necessary that the parties most interested should shew their confidence in the undertaking by subscribing for such amounts of stock as their respective means will warrant, and the Directors think it only necessary to remind the owners of property, mcrehants, mechanics, &c., &c., in Hamilton, and along the line, that the great advantages this road will secure to them, individually and collectively, cannot be attained without their company are made

The Directors, therefore, feel that before applying to the exidents of other countries to subscribe for stock, as large a amount should be taken up in the Province as the means of its inhabitants will permit, not only with the view of retaining in the country as large a share as possible of what must soon prove a most profitable investment, but also as an earnest to foreigners of the public spirit and enterprise

The Directors would remind subscribers for stock, that by an Act passed in the last Session of the Legislature, the orrow money under the guarantee of the Province to make borrow money that it is guaranteed in the other half; by availing of this Act, only one half the subscribed stock would require to be paid up, and as the road is sure to pay large dividends, the stockholders would benefit by the difference between the rate at which such loan could be effected, say 5 or 6 per cent. per annum, and the rate the road would pay, which latter cannot under any circumstances be estimated at less than 10 per cent per an-

The Directors feel a confident hope that if this call is responded to in Canada as it should be, there is every proba-

G. W. R. C. Office, Hamilton, 3rd August, 1849.

The Provincial Parliament is further proogued until the 13th September next. The Board of Health of Montreal, have

passed a resolution prohibiting all equestrian exhibitions, concerts, &c., during the prevalence of the Cholera. THE NAVIGATION LAWS-FIXED DUTY. Government House, Montreal, July 25, 1849.

Sir—I am commanded by His Excellency the Governor General to transmit, for the information of the Board of Trade, Hamilton, the copy of a Despatch received by His Excellency from Earl Grey, in reference to the petition addressed by that body to Her Majesty on the subject of the

Navigation Laws.

I have the honour to be, sir,
Your most ob't humble serv't
T. CAMPBELL, I T. CAMPBELL, Major. President of the Board of Trade, ? Hamilton.

[COPY.]

My Lord—I have deferred acknowledging your Lordship's despatches, of the 3rd and 5th of January and 1st May 1849, until it should be in my power to communicate to you the final decision of Parliament on the measure submitted to it by her Majesty's servants, for the removal of those restric-tions upon the commerce of Canada, to be relieved from tions upon the commerce of Canada, to be relieved from which is the principal object prayed for in the Petitions to her Majesty, transmitted by your Lordship with these despatches. You will now inform the Petitioners that their Petitions were duly laid before the Queen, and that her Majesty was pleased to receive them very graciously; and you will at the same time express to them the very great satisfaction I feel in being able to communicate to them, that nan, which may be thought more desirable for the by the Act of Parliament to "amend the law in force for the ment of British Shipping and Navigation," which | Flour, superfive (in Bairels) ...... has just been passed, and of which I have the honour to enclose a copy, the prayer of their petitions has been granted by freeing the trade of Canada from the last of the restrictions formerly imposed upon it by British Legislation. formerly imposed upon it by British Legislation.

The Petition of the Montreal Board of Trade prays not only for the repeal of the navigation laws, but also that a fixed duty of not less than five shillings a quarter may be imposed upon wheat imported into this country from any but Colonial ports—that from Colonial ports being allowed to enter free of duty.

Her Majesty's servants have been unable to recomm to Parliament a compliance with this part of the petition, as the measure prayed for would have been entirely inconsistent with the principles of that commercial policy which Parliament has deliberately decided on adopting, and which they believe to be best calculated to promote the permament interests of the empire at large, while at the same time they

as I have mentioned should be imposed.

Looking to the remarkable natural advantages which Canada enjoys, to the great public works by which those advantages have been improved, to the industry and enterprise which distinguish her rapidly increasing population, I can entertain no doubt that now that full scope will be given for the exertion and energy which will be displayed in turning these advantages to the best account, it will soon be proved by the result that the trade of Canada does not require to be artificially fostered, but that, on the contrary, under the stimulus of free competition it will rise rapidly to a prosperity far more solid and lasting than that which could be created by any factitious encouragement.

The importance of the relief which will be afforded to the

The importance of the relief which will be afforded to the Trade of the British Colonies generally, and more especially to that of Canada, by the Act which I now transmit, cannot, I believe, easily be over-estimated, and it is my earnest hope that the inhabitants of Canada will see in this measure a new proof of the desire of Parliament to promote their welfare and to advance their prosperity.

(Signed) Right Hon, the Earl of Elgin.

We yesterday called upon the superintention, offering a reward of £50 for the discovery of the person who set fire to the English Church at Norwichville, C. Sherwood's Galvanic Embrocation.

Hear the opinion of a professor of the University of pensylvania, which was published in the Medical Journal, in 1847. In various local diseases I have tested the efficacy of Dr. Sherwood's Embrocation to my satisfaction. In Erysipelas, no matter where present, or of what description, he found the no matter where present, or of what description, he found the Embrocation, painted over the parts with a hair pencil brush, preferable to leeches, lotions, incissions, scarification or caustie. When pain and throbbing only existed, one or two applications of the Galvanic Embrocation, cut short the disease, and where superation had commenced, its repeated use, not only checked the progress of the disease, but caused the deposited matter to be absorbed. Not a single case of failure occurred when the Embrecation was applied before superation took place; and even then the pus was much less in quantity, than where poulices were used.

> READ THIS. From the Boston Post.

From the Boston Post.

Boole's Hyperion Fluid. We have repeatedly spoken in favour of this celeb ated article for the hair, and from the praise of those who have used it, we believe were fully justified in doing so; we therefore cheerfully give place to the following from the agent in Worcester—— "The sale of the Hyperion increases, and we are confident, will supersede all the other preparations in use. We herewith enclose you a certificate, as one of the many proofs of its entire success:

"This may certify, that nearly eight months since I lest all uy hafr and for six mouths my head was entirely bald; at the end of that time, I purchased a bottle of Bogle's Hyperion Fluid of D. Scott, Jr. & Co. the agents in Worcester. Since then, I have used it regularly and strictly according to directions, in consequence of which the hair has started all over my head. It is now about an inch long, and growing rapidly.

ing rapidly.

INDISPENSABLE. From the Boston Times of Fah. 12, 1846. Society's House, 5, King Street West.

Toronto, July, 1849.

BRITISH AMERICAN FIRE AND LIFE

Bogle's Hyperion Fluid is now considered by all who have to be the best article for the hair in use. To those troubles dandruff, or whose hair is falling off or turning grey, we char recommend it. At the ladies' toilet, it is now considered ind sable. We refer our readers to Mr. Bogle's advertisement in an
