**KELSEY WARM AIR HEAT MAKERS**

**FUEL SAVERS GENERATORS (PTD)**

**Will Positively Warm Rooms**

Long distances from or on a level with the Generator.  
This cut shows the "Patented Positive Cap Attachment" located over two of the long, hollow, corrugated sections. By extending a pipe from this "Positive Cap Attachment" the warm air coming through these particular sections must be delivered in the rooms thus connected.

By the closing of the damper Z the flow of warm air can be diverted into the general Warm Air Reservoir.

**THE KELSEY** is not in the same class as the ordinary Hot Air Furnace.

**THE KELSEY** has three times as much Heating Surface and three times as much Air Capacity; therefore more economical and much better adapted to the Warming and Ventilating of Schools, Churches and Large Residences.

OVER 1500 KELSEYS in use in the City of Syracuse, N. Y.  
Our printed matter tells all about them.

**THE JAMES SMART MFG. CO. LIMITED**

Exclusive Makers for Canada **BROCKVILLE, ONT**
