**THE PROPHET OF THE GREAT
SMOKY MOUNTAINS.**

By CHARLES EGBERT CRADDOCK, author of "In the Tennessee Mountains." "Down the Ravine," etc. 16mo, \$1.25.

This is one of the most noteworthy of American novels. The striking figure and fate of "the prophet," the cave and stealthy operations of the "moonshiners," and the engaging love story which runs as a golden thread through it all, are depicted with great power and fascination.

POEMS OF NATURE.

By JOHN G. WHITTIER. A Notable Holiday Volume. Illustrated with Engravings from Nature by ELBRIDGE KINGSEY, 4to, tastefully bound, cloth, \$6.00; full persian levant, with cover design in antique and gold, \$12.00; full polished calf, tree panel inlaid, with sprinkled border, a new and elegant style, \$15.00.

**LIFE AND LETTERS OF LOUIS
AGASSIZ.**

By ELIZABETH C. AGASSIZ. With Portraits and several Illustrations. 2 vols. crown 8vo, \$4.00.

Mrs. Agassiz has written in the most delightful manner the story of the great naturalist's life, and has woven into the narrative a large number of his letters, the whole forming a peculiarly attractive biography and a work of remarkable value and interest to all students of Natural History.

AMERICAN COMMONWEALTHS.

Vol. VI. KANSAS: The Prelude to the War for the Union. By LEVERETT W. SPRING, Professor in the University of Kansas. With a fine Map. 16mo, gilt top, \$1.25.

No one of the United States has a more distinctive and memorable history than Kansas. It was for a few years the battle-ground between Slavery and Liberty, and its early history is crowded with incidents of the desperate conflict. Professor Spring tells this dramatic story impartially, and adds whatever is needed to complete the history of the State, making a book of great significance and interest.

ST. PHILIP'S.

THESE BOILERS

Are not only the cheapest manufactured, they are the best and simplest, being easily operated by any one competent to care for a hall stove.

We Solicit Examination by the Trade.

We call attention particularly to the construction of FIRE POT. It will be noticed by an examination of the engravings that between the fire and the iron containing the water there is a lining of brick, by the use of which we obtain a perfectly bright fire on the outer edge as well as in the centre, which is the great defect in all other Boilers.

HEATING SURFACE.

On examining the engravings it will be observed that the products of combustion, gases, heat, etc., after leaving the fire pot section are carried through a number of tubes into an expansion chamber, where, striking the bottom of the next section above, they spread to find their exit through another series of tubes to another expansion chamber, where they are spread as before, thus striking successively the bottom surfaces of five sections before reaching the final exit at the pipe leading to the chimney flue.

It will be at once conceded that heat applied in this way is much more effective than though applied to the side surface of cast or wrought iron pipe; a familiar illustration of this will be afforded by suggesting the relative value of fire applied to the bottom of a tea-kettle or to its side.
