

the basic bibliographic information appearing in the printed Chemical Abstracts. The subject coverage includes Applied Chemistry, Biochemistry and Biology, Chemical Engineering, Classes of Substances, Macromolecular Chemistry, Organic and Inorganic Chemistry, Physical and Analytical Chemistry, Properties and Reactions.

The following sources are included in CA Search: journal articles, patents, reviews, technical reports, monographs, conference and symposium proceedings, dissertations, and books. Over 10,000 primary journals are abstracted. This includes coverage from over 120 countries. The database is updated two times a week with approximately 17,000 records per update. CA Search covers the time period 1967 to the present.

2.4 CAB Abstracts

CAB Abstracts is a comprehensive file of agricultural and biological information containing all records in the 26 main abstract journals published by Commonwealth Agricultural Bureaux. Over 8,500 journals in 37 different languages are scanned for inclusion, as well as books, reports, theses, conference proceedings, patents, annual reports, and guides. In some instances less accessible literature is abstracted by scientists working in other countries. About 130,000 items are indexed each year. Significant papers are abstracted, while less important works are reported with bibliographic details only. The journals included in CAB Abstracts cover the following subjects: agricultural engineering, animal disease, biotechnology, horticulture, nutrition, veterinary science, entomology, plant pathology, pesticides, fertilizers, weeds, and world agricultural economics.
