Games

**CANADA'S WORKFORCE COMPETES WITH THE WORLD'S BEST**

*An exceptionally well-educated, talented and diverse workforce is the engine behind Canada's competitive knowledge-based economy.*

*A country's greatest asset in a knowledge-based economy is a smart workforce, and Canada is rich in talented human resources. While investing in its people, Canada is also providing over \$3.1 billion over two years in knowledge infrastructure. Its reward: the most highly-educated population in the OECD. Because its world-class schools and institutions train workers to such a high standard, Canada attracts the attention of businesses looking to expand and succeed globally.*
