

PULP NOTES.

Mr. Ali, a lumberman of Thirty-One-Mile Lake, Que., states that it is the intention of two American capitalists to build a pulp mill on that lake next spring.

The Electric Light and Power Company of Quebec are building a large power house at St. Gabriel Falls, Que., where it is proposed to establish three pulp mills.

It is said that H. R. McLellan, of St. John, N.B., has in view the erection of a pulp mill on his timber property at St. Mary's, on the north shore of the St. Lawrence river.

It is rumored that the International Paper Trust has purchased the Guise water power on the St. Maurice river, in the province of Quebec, and will erect a large pulp mill there.

Mr. E. V. Douglas, of Philadelphia, who is interested in the Kakabeka Falls, on the Kaministiquia river, near Port Arthur, Ont., is understood to be negotiating for the building of a pulp mill in the vicinity.

A wind storm recently demolished some of the walls of the new pulp mill now in course of construction at Hawkesbury, Ont., for the Riordan Pulp Company, as a result of which the mill will not be completed as early as was expected.

Mr. Harry B. Wood, of Argyle Building, 45 Hanging-Ditch, Manchester, England, has been appointed agent for the Laurentide Pulp Co., of Grand Mere, Que., and will handle their production of sulphite and mechanical pulp in the British market.

The Maritime Sulphite Fibre Co., of Chatham, N. B., have ordered a 500 h.p. cross compound condensing engine from the Robb Engineering Co., to replace their present 250 h.p. engine and to provide for contemplated enlargements of their plant.

The new mills of the Laurentide Pulp Co. at Grand Mere, Que., are now almost completed. The plant has cost about \$1,500,000, and is modern in every respect. The daily production of sulphite pulp will be 75 tons, and of ground wood 100 tons.

Mr. W. G. Reid, of Montreal, who was given an extensive franchise by the Newfoundland government, is said to be considering the erection of a pulp mill at Grand Lake, with a capacity of 162 tons of dry pulp per day. For this purpose a company is being formed.

Mr. A. Drewson and his brother, Dr. Drewson, of New York, have just made an extensive tour of the pulp wood districts of the Petawawa river, with the intention of establishing large pulp mills in the vicinity of Pembroke, Ont. They hope soon to secure the necessary capital to carry out the proposed enterprise.

At a recent meeting of the Cushing Sulphite Fibre Co., of St. John, N.B., it was stated that Captain Partington, of the firm of Olive & Partington, Manchester, England, had agreed to furnish two-thirds of the capital for a 50 ton mill. An effort is now being made to secure local capitalists to subscribe the balance of the money.

Dr. Vigo Drewson, of New York, vice-president of the Petawawa Lumber, Pulp & Paper Company, was in Toronto last month. This company holds liberal concessions from the Ontario government setting aside extensive tracts of spruce lands in northern Ontario for the purpose of permanently supplying raw material for the manufacture of wood pulp in the large mills which this company will build at Petawawa, Ont., where it has secured about five hundred acres of land and all water power rights on the Petawawa river, in the vicinity of the Canadian Pacific Railway station. The com-

pany expects to have in operation before the end of the season a plant with a daily capacity of 50 tons of dry sulphite fibre. The company will probably build a paper mill also, of about 100 tons daily capacity.

A meeting of Canadian pulp and paper manufacturers was held in Montreal on September 14th, at which the following firms were represented: E. B. Eddy, of the E. B. Eddy Company, Hull; John McFarlane, of the Canada Paper Company; J. F. Patton, of the Dominion Fibre Company; J. Davy, of Meriton; F. H. Clergue, of the Sault Ste. Marie Pulp & Paper Company; W. G. Jones, of the Acadia Pulp & Paper Mills, Halifax, N. S.; Hamilton & Ayers, Limited; F. C. Soucy, of Old Lake Road, Temiscouata; Jno. R. Barber, of Georgetown, Ont.; St. Raymond Pulp Company - Fraser's Company. After a lengthy discussion, the following resolution was adopted: "It is the sense of this meeting that an export duty be immediately placed on all pulp wood exported from Canada (no matter in what shape or size), which would be equivalent to the present import duty on Canadian pulp entering the United States, unless the United States admit Canadian pulp, both chemical and mechanical, free of all import duty."

The exhibit of Campbell Bros. at the St. John Exhibition consisted of carriage and car springs, axles, chopping, bench, boy's, hunter's, fireman's and ice axes, also hatchets, chisels, slicers and adzes. Their exhibit was somewhat different from that of last year, inasmuch as they took goods from stock and showed exactly what they sold to their customers. They claim to have booked some good orders. Their brand of hand made black axe seems to be the favorite with lumbermen.

"A Home away from Home."

Albion Hotel

22 Sackville St., HALIFAX, N.S.

S. LeBlanc & Co., Props.

This well-known Hotel, under new management, has been Renovated, Refurnished, and Thoroughly Improved throughout, and is now First-Class in every respect.
