

- Lice, 244
 - prevention of, 245
 - trench fever probably spread by, 244
- Lime, treatment of wounded in the, 163
- Liquid fire, 17
- Liquor pancreaticus, 72
- Listerian treatment, usual adequacy of, in civilian practice, 282
- Latmus milk, for culture of *B. paratyphosus*, 67, 74-5
- Liver, wounds of the, 550
- Local infection, end results of, 116-21
 - initiation of, 97-9
 - progress of, 102
 - reaction to, 99-102
 - - serous cavities, in wounds of, 121-4
- Loeffler's blood-serum medium, 73
- Ludwig's angina, vaccine treatment of, 13
- Lung, abscess of the, 575
 - engorgement of the, 306
 - gangrene of the, 518-9
 - wounds of the, see Thorax, gunshot injuries of the
- Lymph, exuded after infliction of wounds, 156
- Lymphocytes in wound defence, 102
- Machine-gun wounds, infection of, 269
- McIntosh's cement, for securing anaerobiosis, 79
- McMee and Dunn on gas gangrene infections, 152, 155
- Maggots, prevent the developm. of, of gas gangrene and other virulent wound infections, 93-5, 145-6
 - benefit caused by, striking cases of, 93-4
- Malaria, cerebral type, 208
 - hemorrhage, secondary, and, 180-1
 - local effect of, on wounds, 214-18
 - post-mortem signs in, 219-20
 - quinine, intramuscular and intravenous, treatment by, 111-12, 181-2, 209-10
 - severity of Salomka type of, 207
 - tetanoid symptoms in, 209
 - treatment of, by intramuscular quinine, 209-10
 - wounds, general effect of, on, 127, 209-20
- Malarial anaemia, 212-14
 - parasite, examination of blood for, 218-19
- Manifest damage of tissue, 24
- Mane, wounds after the Battle of the, 268
- Maxilla, gunshot wounds of the, 451-3
 - complications of, 451
 - tracheotomy in cases of, 451
 - treatment of, 452-3
- Median nerve, injuries to the, 586-590
- Mediastinitis, 519, 535
- Membranes, resistance of the, to infection, 123
 - wounds of the, 191
- Meningitis, 470, 501
- Metacarpal, Metacarpus, see Carpal Carpus
- Meta-taric gas gangrene, 201-2, 204
- Metatarsal, Metatarsus, see Tarsal Tarsus
- Methylene blue, Kühne's, 105
- Micro-organisms, classification of, 30, 37
 - functions of, 20-30
 - in wounds, 30
 - general character of, 20, 33
 - see Bacilli, Bacteria, Cocci, etc.
- Micrococci, 30
- Micrococcus catarrhalis*, 50
- tetragenus*, 49-50
- Microscopic history of wounds, 102-113
 - stages of, 110-13
- Minenwürfer, see "Oil-cans"
- Missiles, kinetic energy of, 24-5
- Monoplegia, temporary, 26
- Morphia, administration of, on the battlefield and in the rear, 88, 233, 255, 257
- Multiple wounds (grenade or bomb), treatment of, 26, 278-80
- Muscle hernia, 22, 147, 156
 - injury of, 147, 154-6
 - oedema, 147, 156
 - stupor, 6
 - sugar, fermented by anaerobes, 147
- Musculo-spiral nerve, injuries of the, 500
- Myalgia, 243-4
- Neck, wounds of the, vaccine treatment of, 130
- Necrosed bone, vaccine treatment of, 129
- Nerves, wounds of large, 11
- Nerve-trunks, to be saved if possible, 274-5
 - lesions of, in joint injuries, 330
- Neurasthenia in cases of jaw wounds, 451
- Neuve Chapelle, wounds after, 268
- Non-penetrating wounds, 4
- Normal saline, administration during operations, 281, 532-3
 - in cases of shock, 280
- Nursing, active service conditions, under, 325-9
 - Carrel-Dakin treatment, applying the, 327
 - tent hospitals and huts in, 329
 - treatment of wounded on arrival, 328-9
- Oedema, a cause of gangrene, 22, 98, 110
 - reactionary, after infliction of wounds, 22
- Oedematous muscle, hernia of, 22, 147, 156
- "Oil-cans," or Minenwürfer bombs, nature of injuries caused by, 13-14
- Operation, preparation of cases for, 280-1
 - treatment for shock previous to, 280
- Opsonins, 100
- Organic matter, break-down of, by bacteria, 34
- Organisms in different stages of wounds, 110-13
- Osteomyelitis, acute infective, 337; see Complications of injuries to bones and joints
