

COBALT---Estimated Worth of January Shipments Over \$1,500,000---COBALT**ANOTHER SILVER CAMP
S BEING PROMISED**

In the Sutton Bay District, Where
Two Mines Are Now
Operating.

Cobalt, Jan. 31.—(Special.)—A new mining district in Northern Ontario, which threatens to rival the far-famed Cobalt camp, is opening up in the Sutton Bay country, situated in Harris Township, lying eight miles east and one mile north of the Town of New Liskeard. The new camp is commonly called the Casey mountain range, and at the present time, while the showings are not yet of the magnitude of the Casey mountain range, the future of the Casey mines.

The Casey mountain range is identical with Cobalt in formation. The same lower Huronian conglomerate with diabase contact is found to permeate the district, which lies on the edge of a swamp or the former level of Lake Temiskaming in pre-historic times.

The mountain range rises to a considerable altitude and runs east one and one-half miles, and has all been claimed. Native lead silver in fairly large quantities has been found, and the two mining companies already operating are very much encouraged and expect to run into pay-off within a short time.

The companies operating are the Cobalt Silver Mining Company and the Silver Creek Mining Company. The Silver Creek Mining Company is in charge of Herbert Murray, a mining engineer of large and varied experience, who has been gathered in California and at Nome, Alaska. Mr. Murray is of a conservative temperament, but even this trait does not prohibit him talking enthusiastically regarding the future of the Casey mountain range. At present the Silver Creek Mining Company has fifteen men working on the claim, busy engaged in cross-cutting and sinking a shaft to catch several veins of great promise. The several fissures are 4 or 5 inches wide, and carry cobalt ore and native silver. The decomposed cobalt bloom on one of these veins is as fine as not better than any in the Cobalt district farther south. The Silver Creek Mining Company has a nicely equipped camp, and in the early weeks of operation the machinery will be established for working the mine. The Cobalt Silver Mining Company has a capital of \$500,000, divided into dollar shares, and Pittsburgh magnates are largely interested in the proposition.

The Bucknell Mining Company, next to the above claim, is working twenty-five men. They have dug out an engine and boiler-house, preparatory to establishing an up-to-date plant. A shaft has been sunk 40 feet on the property, and drifting from this point 60 feet has produced the vein followed has a good showing of smallite, or cobalt, ore and native silver, and recent assays promote confidence for the future in a large measure.

The Casey mountain range is two and one-half miles from White River, a wagon road making transportation easy and convenient. The road is well watered and abundant for mining purposes.

Chas. A. O'Connell, manager of the Green Meehan Company at Cobalt, predicts big things for the Casey mountain country.

Consequently, with the endorsement of Mr. O'Connell's experience, the Sutton Bay district should before long make a name for itself.

C.P.R. FOR LABRADOR?
Story That Extension of Line for Freight Purposes Is Contemplated

Quebec, Jan. 31.—The acquisition by the C. P. R. of the Quebec Railway, Light and Power Company, and the electric railway from St. Joachim to Murray Bay is taken to portend another extension of great magnitude on the part of that transcontinental corporation.

The design of the C. P. R. is said to be rather than an exploitation of the resources of the Labrador Peninsula. With this object in view, the company is credited with a desire to build a line from the city direct to Cape Charles, which lies at the entrance to the Straits of Belle Isle.

The line thus constructed, one thousand miles in length, will be used as a passenger route, as the railway would be too long and tedious, but as an outlet for grain and other products. Not only will vessels sailing from Cape Charles for Britain save three days in the trip to Liverpool, but they will be free of all danger. This makes the C. P. R. a formidable competitor with the G. T. P. in the freight trade.

Less snow by half falls on the Labrador coast than in Western Canada, so that the railway will not have this difficulty to face.

SIN JOHN SEE DEAD.
Sydney, N.S.W., Jan. 31.—Sir John See, ex-premier and colonial secretary of New South Wales, is dead. He was born in England in 1852, and was a director of many Australian public companies and institutions.

NOT ALLOWED TO VOTE.
St. Petersburg, Jan. 31.—Professor Paul Mulkov, leader of the Constitutional Democrats, has been denied the franchise privilege, because a license to trade, secured by him to enable him to vote in the city, is not a year old.

LEAVING MANCHURIA.
St. Petersburg, Jan. 31.—The Russian evacuation of Manchuria commenced today with the departure of the Moscow Regiment.

Explosive Wreck Hotel.
Buffalo, N.Y., Jan. 31.—Two simultaneous explosions of gas, followed closely by a third, this morning practically destroyed the hotel of Wm. F. White at Niagara and Perry streets. Seven men, including three firemen and a patrolman, were more or less injured, none seriously. Financial loss \$20,000, insured.

Legislative Session.
New York, Jan. 31.—William J. Donahue, member of the assembly from the fourteenth district of Kings County, committed suicide today by shooting himself in the head. No cause for the act is known.

**EARL'S DAUGHTER SHOT
HUSBAND HELD THE GUN**

Fatality During Pheasant Shoot in
Northumberland—Lady Dorothy
Cuthbert the Victim.

London, Jan. 31.—Lady Dorothy Cuthbert met with a tragic death at the hands of her husband during a pheasant shoot at Beaufort Castle, Northumberland, to-day.

The victim was only two yards from her husband, Captain James Harold Cuthbert, when his gun went off by accident. The charge entered her head, and she fell dead on the spot. Lady Dorothy was a daughter of the present Earl of Stratford.

DENATURED ALCOHOL.

Agricultural Editor: The home manufacture of alcohol will provide a market for inferior, smutty or rusted wheat.

Unfortunately in the good yields of our western provinces there is always a percentage of each class. These unmerchantable grades can be put to the best use when turned into alcohol.

Barley will be raised in increasing quantities in our western provinces, necessarily so as a rotation crop; the malt produced therefrom is indispensable in the manufacture of alcohol. In the most northern parts of New Ontario, Manitoba and Saskatchewan spelt can be safely grown, where it would be a risk to depend on wheat or barley.

From tests already accredited, spelt furnishes a large percentage of alcohol. Corn is only a small crop in Canada. The manufacture of alcohol would enable the Canadian farmer to sell all he wished of the corn, cobs and stalks, taking it direct from the field freshly cut to the railroad cars.

The irrigated and semi-irrigated lands in Southern Alberta and Saskatchewan are well adapted to the growing of spelt. The sugar-beets producing a good yield of alcohol.

Every year in Ontario there are many orchards with large quantities of apples rotting on the ground. These should be used for distillation of alcohol. The feasible way to get rid of worms, grubs, etc., is to clear out the orchard to the distillery.

Potatoes throughout Ontario in the past few years have been more or less diseased—a source of loss to both farmer and consumer. It has been demonstrated that pure alcohol is extracted from good, bad, small or overgrown potatoes.

The most remarkable output of the patent still in making pure alcohol is the reputation of the material that however impure the raw material the remains after distillation are pure and wholesome.

The demand for screenings at Minneapolis in the past two years has increased 300 per cent, mainly caused by farmers entering the dairy business. It will naturally follow that farmers in central Canada will require more screenings and will feed to meet the demand. It will need some large distilleries, whose by-products will help out the dairy farmers and cheapen the cost of feeding export cattle.

The home manufacture of ethyl will enable the Canadian manufacturers of paints, varnishes, shellacs, lithographs, glazed papers, pianos, furniture, and linoleum, straw and felt hats, etc., to produce goods equal to imported goods.

The inventions and experience of the past year have shown that denatured alcohol is the cheapest, purest, least dangerous and most powerful illuminant for household and public use. As motor-power for general use on farms, it is gaining favor.

WON'T DISCUSS DISARMAMENT.

Washington, Jan. 31.—It is stated authoritatively that neither the question of international disarmament (including kindred subjects of restriction of armaments) nor the Drago doctrine will be placed upon the program of subjects for the Hague conference next June or July.

Increasing Cuban Rural Guard.
Washington, Jan. 31.—As a result of a conference at the White House today between President Roosevelt, Secretary Taft and Gen. Bell, chief of staff, an order has been issued directing an increase of the rural guard of Cuba from 6000 to 10,000 men.

The purpose is to avoid increasing the number of American troops in the island, as originally intended, the native guards being more acceptable to the people.

Centennial of Jarvis St. C. I.
