

desired to be on the new way that leads to eternal life. We know it is "not by might nor by power, but by My Spirit, saith the Lord."

Amid the wildest of the people, the only way to reach them is to go from house to house, as we have no church. Our hope is to build one soon. Many of the young people from the other tribes promise to come on this mission as soon as we have the church built. We have received ten on trial during the six months. Our prayer and effort is the winning of this lost tribe to the faith of Christ.

Portions of this district have been disorganized by the rebel movements of the past year; and the White Fish Lake mission has been unexpectedly deprived by death of its founder, and for many years its devoted and successful pastor. The scanty information received by the General Board is a subject of deep regret, as there are but three reports to place upon record from a purely missionary district, where there is a large outlay of the Society's funds.

WOODVILLE.

The school was opened as soon as it was possible with a good average attendance considering the number of families at the mission.

The parents appear to appreciate the advantages of the school, as they are anxious for their children to learn the English language.

We have arranged the Cree syllabic with a few additional characters, so that we can apply it to the Stoney, and are teaching the children to read and write their own language.
