

Social Notes of Interest

Mrs. H. H. Pickett, who had been visiting her sister, Mrs. William Gordon and Miss Annie Orr, in Rexton, is now in Moncton, the guest of another sister, Mrs. H. H. Warren, Cameron street.

Mrs. Frederick Estey, who had been visiting her sister, Mrs. T. W. Knapp, of Sackville, has returned home.

Mrs. Charles A. Clark is visiting her daughter, Mrs. Stanley S. Nason, in Montreal West. Mr. Clark, who was in Montreal with Mrs. Clark and his daughter, has returned home.

Miss Alberta Burns, R.N., formerly in the Victorian Order of Nurses in Moncton, and well known in St. John, has gone to McGill University, Montreal, to take a special course in her profession.

Miss Minnie Lawlor, who had been the guest of her aunt, Mrs. C. M. Mersereau and Mr. Mersereau, Bathurst, has returned home accompanied by her aunt, who will visit relatives here.

Dr. and Mrs. W. P. Bonnell, and Mr. and Mrs. Donaldson Hunt, who have been on a motor trip to Montreal, Toronto and New York, returned home yesterday.

Among those who left for Boston on Saturday on the steamer Governor Dingley, were Mrs. F. W. Seely and little son, Arthur, who had been spending the summer at Fair Vale. They were accompanied by Miss Muriel Seely, who will enter the training school for nurses at the Newton Hospital, Newton Lower Falls, Mass.

Miss Ruth and Miss Margaret Hanson, 9 Wellington Row, accompanied their aunt, Mrs. R. S. Phillips, to her home in New York, where they will visit for some time. They will also be the guests of their uncle, Dr. E. S. Hanson, of Newton Highlands, Mass., before they return home. Mrs. Phillips was a guest of relatives here for several weeks.

Pyorrhea is a disease of the gums—not the teeth

You may take good care of your teeth and still get Pyorrhea. Once Pyorrhea secures a firm hold, pus pockets form, gums become weak and flabby, the teeth loosen and fall out no matter how white and sound they may be.

Forhan's means healthy gums

It contains the right proportion of Forhan's Astrin-gent, as used by the dental profession in treating Pyorrhea. Forhan's protects the gums, keeps them in a firm, healthy condition, and leaves the mouth sweet, fresh and wholesome. If you don't care to discontinue your regular tooth paste, at least brush your teeth and gums once a day with Forhan's. Forhan's is more than a tooth paste; it checks Pyorrhea. Thousands have found it beneficial for years. For your own sake ask for and get Forhan's For the Gums. At all druggists, 35c and 60c in tubes.

YOUNG FACTORY GIRL IS GENIUS Associated Industries Puts Her at Head of All New England Workers.

Boston, Sept. 30.—A search for youth-ful genius in the factories of New England, with the idea of lifting from humdrum tasks to wider opportunities those who might otherwise remain hidden, has developed a young woman of exceptional promise, five boys of marked ability and the belief that there may be other gifted children found at bench, frame or spindle, according to the report made today by a committee of the Associated Industries, which has been engaged in the work for eighteen months, assisted by Harvard educators.

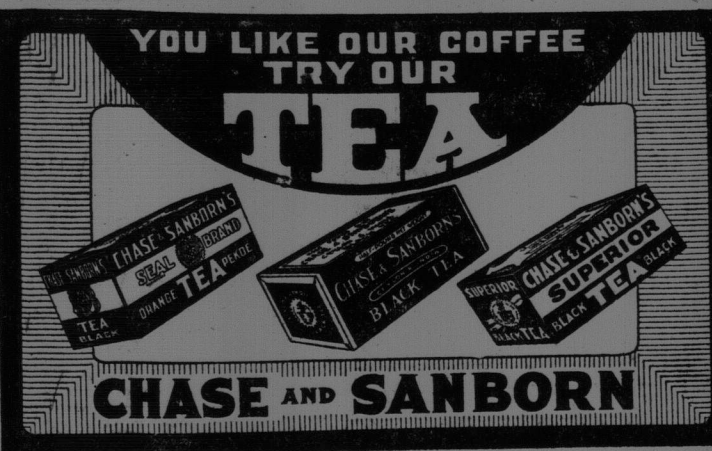

The young woman, 23 years old, brighter than any of the boys whom passed examinations that placed them in the class with the highest 5 per cent. out of 100,000 cases in army testing, is a product of the Central West, where she attended high school. Explaining that she had combined substitute work in the employment department of a large corporation with her regular duties as school teacher, the committee said it was not quite exact to say she might be called a "gift child in industry," but added that in the course of its investigation it had found "signs that there may be such."

The young woman is not named. The committee says of her that she "spent two years in college, had been employed as travel relief agent of the Michigan Central Railroad, had acted as business manager for a taxi company, and had served as laboratory technician and a physical educational director for a girls' training school in Texas." It was said that she "had an unquenchable ambition to go through a medical school so as to fit herself for the practice of medicine, with especial reference to children's diseases and to industrial medicine work." Lack of financial support prevented, but it was indicated that this would be forthcoming as a result of the survey.

Mrs. J. E. Worcester of this city, who originated the idea, conducted a survey in five factories, out of which she obtained twenty boys and one girl of unusual promise. Harvard professors went to the factories and examined the youngsters of possible genius, but under the stiff tests that they imposed in order to find only the "extremely exceptional child," reduced the twenty-one to six. These six, five boys and the young woman, went to Harvard for further physiological and intelligence tests, with the result that, although the college specialists said all rated Class A in the tests, the girl scoring highest in personality and intelligence, none of the boys possessed the very high qualities sought. But the girl did qualify.

"She showed poise, outlook, a fine physique, excellent practical judgment and great ambition," the committee said.

At the present rate of consumption the coal resources of the U. S. will last 6,000 years.

ST. LUKE'S W. A. MEETS.

The Monday night branch of the W. A. of St. Luke's church held its opening meeting of the season last night with Mrs. Lester Mowry, president, in the chair. Four new members were

received. The plans for the new season were entered into with enthusiasm. A letter from the Chaplain school gratefully acknowledged the sale sent by the branch and Bella McLeod, the little Indian girl for whom the branch had procured an outfit, sent her grate-

ful thanks. The report of the diocesan annual meeting was received. The branch heard with interest of the or-

ganization meeting of the Junior W. A. which had taken place in the afternoon.

The Scourge of Good Housekeeping Conquered at Last

A GREAT boon was opened to Canadian households last year, when Snyder's, Limited, secured rights in this country to the Sani-Bilt mothproofing process and put Snyder's Sani-Bilt Mothproof Furniture on the Canadian market under an absolute and unconditional guarantee. So prominent a place did Sani-Bilt assume in the Canadian trade that soon, like mushrooms, appeared a host of imitations.

"Look," said they. "Mothproof furniture is nothing to boast about. We are mothproof, too."

Manufacturers and selling agents who, one year ago, said mothproof furniture was "impossible," "mere talk," a "fad" and so forth, are themselves now claiming that they have mothproof furniture.

Sani-Bilt Furniture Is Mothproof Absolutely

The Sani-Bilt mothproofing process is the result of twenty years of scientific experiment and research on the part of a group of famous chemists.

Other "mothproofing" processes applied to upholstered furniture were, in some cases, the inspiration of a week or a day in the sudden stampede to secure some of the trade Sani-Bilt Guaranteed Mothproof Furniture has created. Judge how long such furniture stays moth-

proof! Poison processes are merely temporary, at best. Arsenic, for example, dries into dust and escapes into the air you breathe. Gasoline kills moths, but gasoline evaporates. More moths come.

Moths lay their eggs where instinct tells them their young grubs will find food. The food they require is the animal fibre of silk, wool, hair, feathers, etc. The Sani-Bilt process chemically acts upon this animal fibre and makes it useless for moths. It is as though coal oil were poured into human food. All temptation for moths is taken away. The process soaks through and through like a colorless dye. Every fine hair and thread is saturated. Moth grubs won't touch it. They starve to death when left on it, as repeated experiments have proved.

The Sani-Bilt process acts on the only really positive principle for mothproofing that Science has discovered. It is not affected by vacuum-cleaning, dry-cleaning or steam-cleaning. It is odorless. It is permanent. And yet, it doesn't injure a thread or a hair of the finest fabric.

Sani-Bilt Chesterfield Suites are solid and substantial, inside and out. Extra springs, Marshall Cushions and the choicest and widest range of imported tapestries, mohairs and velours. The fillings are clean and new.

Our Guarantee Tag Goes With Every Piece

We give you our unconditional guarantee with each piece of Sani-Bilt Furniture. Read it. It covers construction and durability. Look, also, for our trade mark label under the Marshall Spring Cushions. Make sure.

Leading dealers throughout the Dominion show Snyder's Sani-Bilt Living-Room Furniture. Prices and sizes to suit any and all circumstances. Imitations or "just-as-goods" are never satisfactory. Insist on Sani-Bilt.

Instant Postum—for Health's Sake

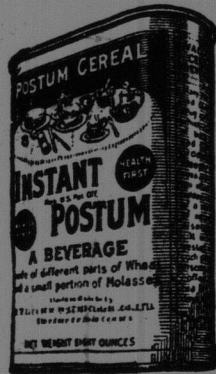

DO the ordinary worries of home, business and social duties upset you more than customarily? Are you more easily irritated, depressed, not able to get a good night's rest? Heed the warnings of harassed nerves—irritated by the poisons Caffeine and Tannin in tea and coffee. Stop this serious drain on your health by changing to Instant Postum—the delightful, invigorating hot beverage which has meant better health for thousands of men and women.

A pure, cereal beverage, Instant Postum makes a delightful hot drink for any occasion. It may be freely enjoyed by children as well as adults with no harmful after-effects. Costing half-a-cent a cup, it is prepared instantly in the cup with boiling water. For those who prefer it, there is Postum Cereal, made by boiling for twenty minutes. Ask for Postum at your restaurant, your club and on the train.

A generous sample tin of Instant Postum will be sent postpaid for 2c in stamps. Write
