

GREAT RAIN MAY AFFECT DERBY

England Swept by Torrential Downpour—May Change Betting.

(United Press.) London, June 3.—Torrential rains are sweeping England. They have already been the cause of several deaths and enormous damage to the growing crops. They have had the effect of cutting off the gas and electric supply of many midland towns and villages.

To thousands of Britishers the damage is a secondary consideration compared with the effect of the rain on the Derby which is run tomorrow. In spite of the efforts of the stewards and the employment of an army of workmen it is certain that the course will be dangerous, especially in the vicinity of the famous Tattenham Corner. If further rains fall there will be sudden late minute changes in the betting odds.

Much satisfaction is felt because the King has decided to run his horse, Knight of the Garter.

U. S. Can't Make Historic Films, Says Fritz Lang

London (by mail) June 3.—Historic film are having a great vogue here now, as well as throughout Europe. They are produced by European studios for the most part, and now comes the sad tidings that America, while it does very well with Wild West stuff, needn't essay historical drama, because it can't deliver.

Fritz Lang said as much. He is perhaps the foremost German producer of massive historical films, and one of the most gifted of European producers. "I would never dream of attempting to make a cowboy film for America," he said. "I could do it no more than the Americans can make historical films. How can they? They have no history. Unfortunately, by they try. But the fact remains that only those countries of Europe can really catch the medieval culture and tradition and represent the spirit of their old legends. My own trouble is that there are so many beautiful stories of the past crying out to be filmed, that I shall die before I have time to do a quarter of them."

Lang came to London from Germany for the presentation here of his film masterpiece "Siegfried." He insists that the moving picture business today, throughout the world is "a fight between the creator and the showman."

UNTRAINED LEADERS.
(Kansas City Star.) Where in America is the science of government taught? Where are the schools that supply executives, legislators? There are none except city hall, campaign stumps and party conference rooms. From these places come America's political leaders, untrained except in vote getting, often without principles or sincerity; we accept them and they rule us.

DEPENDING ON HOW YOU LOOK AT IT.
(William Lyon Phelps in Scribner's.) When one thinks of the vast fully displayed in human history, it is easy to despise human nature; but when one thinks of the vast number of individuals who, with little money, little education, little ability, nevertheless put up a brave front and meet the day's work with uncomplaining serenity, then it is impossible not to see that human nature is sublime.

Former Belle Loses Appeal on Divorce
New York, June 3.—Mrs. Mary Casey Thorne, who before her marriage to Joel Wolfe Thorne of Fifth avenue, was known as the "Belle of Third Avenue," lost her appeal in the Appellate Division from the Supreme Court judgment which had given her husband a divorce and custody of her young son, Joel, Jr.

Mrs. Thorne is a graduate of Barnard College. Mr. Thorne is the son of the late Samuel Thorne, banker, in whose \$2,000,000 estate he inherited an interest. Mrs. Thorne sued for a separation, charging cruel and inhuman treatment. She also charged that she had been wrongfully committed to a psychiatric ward at Bellevue Hospital, and that her son had been kidnapped by her husband. Thorne brought a counter-claim for a divorce, claiming that he was in the United States navy. Mrs. Thorne denied the charge, but a referee found against her, and his report was confirmed by the Supreme Court.

Tombs, 2,000 Years Old Are Discovered
Salzburg, Austria, June 3.—Tombs which are probably more than 2,000 years old have been discovered at Maxglan, near Salzburg, Austria.

There are about 20 mounds of various sizes, in which the ashes of the dead were buried after cremation. Most of the tombs, which date back to 400 or 600 B. C. have apparently been robbed, as they contained nothing more than potsherds, the point of an iron spear, and a few bronze ornaments.

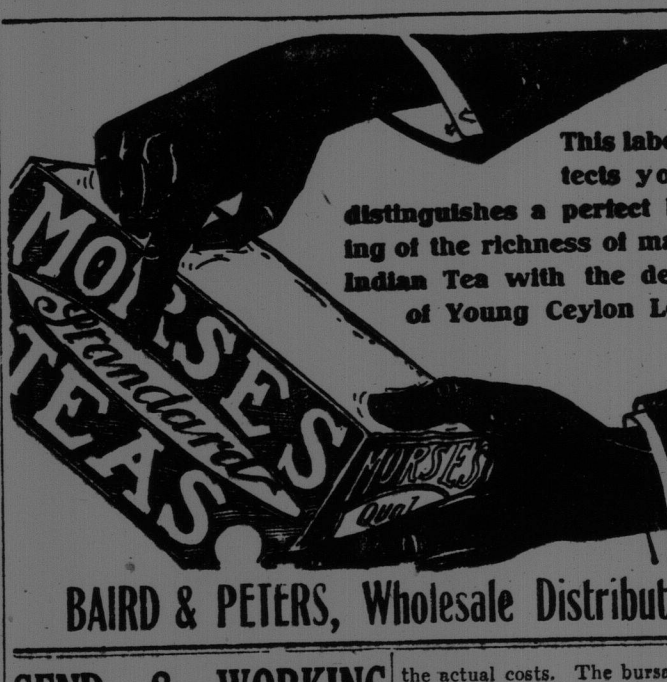

Only one tomb proved intact. It contained a flat bronze basin, a bronze neck ring and an urn.

SEND 8 WORKING GIRLS TO COLLEGE

Undergraduates of University of Wisconsin Raise Money For Scholarship.

Madison, Wis., June 3.—(United Press.)—Two girls from a shoe factory, one from a cafeteria, two office workers, a clerk and two girls from domestic service will be given a term this year in the Wisconsin Summer School without cost to themselves.

The opportunity is due to the work of a small group of young women undergraduates at the University of Wisconsin. They raised the money to provide scholarships for the eight girls, including all tuition and expenses. Living quarters for these girls have been set aside at Barnard Hall, the finest dormitory the university boasts, overlooking the lake. One of the regular students will be detailed to tutor and make each of the visitors feel at home on the campus.

But the college girls will go further. So that these girls from offices and factories will not lose their jobs while at school, their employers have been interviewed and their consent secured to have volunteers among the college girls take over the workers' jobs for the six-weeks' term.

The girls at the head of the movement received 125 applications. It is hoped that with the start of the movement they will be able to widen the scope of the work beginning next year and make it available to an increasing group of workers.

REPAY'S COLLEGE

Student Sends Tech Check to Make up Actual Cost of His Education.

Cambridge, Mass., June 3.—Should a college student pay the full cost of his education when it is demonstrated that it cost the institution more money than he has paid in tuition fees? There is a senior at the Massachusetts Institute of Technology who thinks so, and he has backed up his belief by sending the institution a check for \$1,022.20. His name is withheld.

Impressed by a suggestion made some months ago by Gerard Swope, president of the General Electric Company and a member of the Technology corporation, that the tuition be raised to cover the full cost of education, the student asked the bursar to figure out the actual cost.
