The Boer Leader Ate Heartily and Smoked Like a Philosopher.

C. E. Hands, special correspondent of the London Daily Mail, telegraphed from Paardeberg on February 27th as follows:

At 3 o'clock this morning a sudden and fierce Mauser fire was heard in the direction of Cronje's laager, the cracking of the enemy's fusilade being answered by British volleys. Whatever was happening we were unable to tell on account of the darkness

On the opposite side of the river, near the main camp, the firing was heavy, and we knew that something was being wip-ed off the slate or added to it. For half an hour the firing lasted, then died away, crackled again, and dropped. The silence was punctuated only by occasional shots. At daylight firing recommenced, but with a difference, British shots preponderating. By 6 o'clock it had entirely ceased, and then a rousing cheer from Signal Hill told that the obstinate Cronje had given in. At 7 o'clock he was a prisoner in Lord Roberts's camp. The glory of the surrender is

Largely Due to the Canadians; their trenches were systematically advanced to within eighty yards of the Boer trenches. The enemy kept up a terrible fire, but our men pressed forward, covered by the steady fire of the Gordons, and when daylight came the Canadians occupied the position and rendered the Boer trenches untenable. We now commanded the entire laager,

and Cronje's game was up. Disappointed at the failure of his reinforcements. he sent word that he surrendered.

It was a picturesque scene when Cronje was brought to Lord Roberts at the headquarters camp. A heavyshouldered, almost hump-backed man, heavy-bearded and heavy-lipped, clad farmer-like in drab, and wearing a broad-
