Bear trucks in considerable number have been reported in the woods between Howe's lake and Ashburne lake. A shooting party which was in that vicinity on Saturday saw many tracks that they concluded all the bears in the country were in convention in some adjacent spot. The McAfee report purchase has been practically completed—all the necessary papers including deeds, etc., have been affixed to the signatures of the vendors and the delivery of the \$40,000 in city debentures is now all that remains to be done. The city will start improving its newly acquired property as soon as possible.

The question of salaries paid city employees will be fully considered by a special committee in the near future. Applications for increased remuneration have been received from many employed in civic departments and, while it is not probable that any general advance will be ordered, yet the whole question will be discussed in all its phases.

In three days there has been no word of the steamer *Stanley*, which performed a winter service across the Straits of Fundy between Summerside and the Comberton. Mayor Daniel Thursday telegraphed to Sir Thomas G. Shaughnessy, president of the C. P. R., asking if the company would consider an offer from this city for the establishment here of a new passenger line between Montreal and St. John. Montreal has been after this plum, but has not got it as yet and as railway men say that St. John is peculiarly well adapted for the industry this city has at least a fighting chance.

A complete medical inspection of all trains coming into the province will be made at MacAdam under authority of the Dominion government. The largest excavated dock on the continent, if not in all the world, will doubtless be the Massey dock at Rotterdam, now approaching completion. The dock covers an area of some 150 acres, and will be brought to a preliminary depth of 14 feet, which will afterward be deepened to a depth of 23 feet, so that there will be sufficient water to admit the largest steamships.

MAKES WOODEN LEGS.

Interesting Chat With Manufacturer of Such Mechanical Marvels.

Alfred Riggs, proprietor and practical exponent of mechanical marvels, passed through the city last week on route from his home at Fort Fairfield to Halifax.

Mr. Riggs' most noteworthy triumphs have been in the manufacture of wooden legs—a field in which he has been signally successful, considering his limited opportunities and advantages. "How am I getting on in Halifax?" he said in response to a question—and he paused a few moments as pondering carefully the import of his reply—"Well, I've worked up a business in the past few years and made Yankee competition move on."

"How long does it take to make a leg?" "I've turned out a pair them in a month. It's all in the knack." "Much depends on the kind of wood. I use chiefly beech or poplar. Almost any kind of good hard wood will do. The weight for an adult is scarcely above five pounds. I've just finished a pair for the young Webster boy over in Indian town, and one for Mr. Porter in Lower Cove."

Mr. Riggs has long been known about the city as a personage peculiarly gifted in skilled handicraft. This is evidenced by the ready acceptance from him by those who have been unfortunate enough to lose an arm or leg. He was born in the parish of Simonds and was a boy exhibited unusual cleverness in carving out of wood models of animals and birds. Later he turned his attention to making artificial limbs, in which he has achieved considerable reputation.

We have also been asked to give you the accompanying purse, not as remuneration for your services, for the value of such self-sacrifice and heroic service cannot be estimated in dollars and cents, but as an emblem of our appreciation and gratitude. PUBLIC HEALTH MATTERS.

Provincial Board Meeting—Compulsory Vaccination of School Children.

The Provincial Board of Health met Thursday afternoon in Dr. Bayard's office. There were present: Dr. Bayard, Dr. E. B. Fisher, Premier Tweedie, James Holly and John McMillan.

The meeting was called to consider certain amendments in the bill for the provincial boards will be more closely defined. Instances have, in the past, arisen when the powers of the local and provincial boards were not in conflict. It has also been demonstrated that in some cases the local boards had powers in excess of the provincial board.

It was also decided that the provincial board should to some extent be the governing body, and it was to consider such amendments as will bring into line the condition that yesterday's meeting was held.

The board decided that such amendments were desirable, and they will be recommended to the government. Another matter discussed was the vaccination of all children attending schools in the province, and it was decided to make this compulsory.
