

THERAPEUTICS.

LECTURER—DR. BACKUS.

Instruction in this department will embrace a thorough and practical study of those drugs which have a real Therapeutic value; also the theory and art of prescribing.

MEDICAL JURISPRUDENCE AND TOXICOLOGY.

PROFESSOR A. G. FENWICK.

This course includes lectures upon medical expert testimony and the proper modes of procedure at Coroners' inquests; insanity in its legal relations, and the legal rights and obligations of physicians. Toxicology.—Classification of poisons, their modes of action, treatment, post-mortem appearances and chemical tests; diseases resembling poisoning.

MICROSCOPY.

PROFESSOR D. B. FRASER.

Normal and Pathological Histology receive most careful attention. Students are furnished with microscopes and the accessories necessary for the preparation and preservation of microscopic specimens of their own for future reference. The classes will have opportunity of seeing post-mortems in the autopsy room under the direction of the Pathologist.

A useful and practical course on Bacteriology will be given during the session.

SANITARY SCIENCE AND PUBLIC HEALTH.

LECTURER—DR. GARDINER.

Lectures on the following subjects will be given:
Hereditary influence; causes of deterioration and disease;
