

## Brewster Kneen - A Man of Revolution

# "Colloquium" Coming Next Week

BREWSTER KNEEN

Brewster Kneen will be the main speaker at an S.C.M.-sponsored "colloquium" to be held Friday night, February 23. The theme of this event will be Christianity and Revolution: Paradox or Promise?

Kneen, a fairly young man, was born at Cleveland, Ohio, in 1933. He has been a resident of Canada since 1965. He received a B.A. in economics from Cornell, and a B.D. from Union Theological Seminary, New York. He also studied at Edinburgh University, Scotland, and the London School of Economics. He was not ordained.

#### PAST AFFILIATIONS

For some time, Kneen did student work for the Fellowship of Reconciliation. He was also deeply involved in the development of the Civil Rights and New Left student

movements. For the past two years, Kneen was the National Secretary of the Canadian Fellowship of Reconciliation. His present affiliations include the Latin American Working Group and the Christian Left.

Kneen is presently working full-time at being a freelance broadcaster. He is co-host of the CBC-FM public affairs radio program *Christianity and Revolution*. He has been involved in numerous seminars on international affairs and political theology, at both organization and program ends.

#### HIS TRAVELS

Brewster Kneen's travels have given him a broad international experience. Since 1958, he has spent extensive periods in Eastern Europe, Yugoslavia, Western Europe, the Soviet Union, the British Isles and Scandinavia. Two

weeks ago he returned from a seminar held in Prague, Czechoslovakia.

Kneen has published many articles on revolution. The following quotation is an extract from *Revolution and Intervention*, November, 1966:

*We cannot object to violence on the grounds that this is disruptive of peaceful situations. Nor can we permit ourselves to regard peace as simply the absence of overt or bloody violence. The fact is that in every revolutionary situation the "violence of the status quo" is already very much a part of the situation, being present in the form of sub-human housing, disease, hunger, and exploitation.*

It is expected that several other notable speakers will take part in the colloquium, which will be held in Tilley Hall.

## Engineering Week Continues

### Lt.-Governor Officiates

New Brunswick's new Lieutenant-Governor, Wallace S. Bird, in his first public act since assuming office will officiate at the opening of the new wing to Sir Edmund Head Hall, UNB's engineering complex, this afternoon.

The official opening, which will be held in the new theatre of Sir Edmund Head Hall commencing at 3:30 p.m., will see the Lieutenant-Governor pull a rip cord activating a briquette testing machine as a picture of the closed doors of the lobby of the new wing is projected on the theatre screen.

Once activated, the water from one tank will flow into another tank, thereby increasing the load on the briquette. When the briquette breaks, a button on the machine is automatically activated, changing the slide projected to one showing the lobby doors opened, symbolizing the official opening of the building.

It is appropriate that Lieutenant-Governor Bird, as visitor to the university on behalf of the Queen, officiate at the opening of the \$3,800,000 extension of the engineering facilities, for it was on February 15, 1854, through the interest of another Lieutenant-Governor, Sir Edmund Head, after whom the complex is named, that the first course in engineering was given at UNB, the first such instruction at a Canadian university.

In 1901 the university's first engineering building was also opened by the Lieutenant-Governor of the province.

\* \* \* \* \*

Guest speaker at the opening is Dr. Kenneth F. Tupper, vice-president (scientific) of the National Research Council. Following the opening there will be an open house with guided tours of the new wing.

At 8:00 p.m. tonight, James C. Elms, director of the electronic research centre, NASA, will give the anniversary lecture in the new engineering theatre. Following the open house, the UNB engineers and foresters will meet in their annual "grudge" match. The hockey game should start around 10 p.m.

Tomorrow night Engineering Week will culminate with the engineer's ball at the Lord Beaverbrook Hotel.

## Referendum Called

An estimated crowd of from fifty to sixty UNB engineering students crowded into last week's SRC meeting to protest discussion on a motion calling for a halt in the bombing of North Viet Nam.

As a result of the concern shown by the Engineers the question will be the subject of a referendum to be held before February 23.

The engineers' move comes as a direct result of an emergency meeting of the Engineering Undergraduate Society (EUS) Friday. At that meeting EUS Chairman Eric Champion introduced a motion calling for the SRC to drop the motion on Viet Nam and asked that the SRC not get involved in international political affairs in the future. The motion passed with an overwhelming majority at the meeting although only 130 members of the 700 member society were present at the meeting.

Discussion on the motion at Council centered on the right of the SRC to legislate on such matters.

Champion speaking for the EUS said that the members of that organization felt that the Council was not truly representative and that Council had no business discussing the subject because "in international affairs it should be the students' right to dictate to his own conscience."

John Oliver who had originally proposed the motion made reference once again to the declaration of the Canadian student and maintained that this declaration, ratified by Council two years ago and now part of Council's policy, made it the right and the duty of the representative organi-

zation to pass motions on these subjects.

Discussion on this was settled when Rob Asprey, chairman of the meeting ruled that

the motion was indeed a valid one and shortly after Peter Blair made an amendment to bring the motion to the students.

## CUP COMMISSION NOW SITTING

A CUP Commission of Inquiry has commenced their deliberations at Mount Allison University in the wake of the dismissal of Allan Rimoin, Editor of the campus newspaper the *Argosy*.

Rimoin was dismissed by university president L.H. Cragg in the wake of charges of editorial "irresponsibility" and "shaming the stature of the university community", two weeks ago.

Chairing the commission for the national union of newspapers (CUP) is Bob Parkins, Managing Editor of the University of Toronto Varsity. Representing the Atlantic region of Canadian University Press is Len Pace, editor-in-chief of the Acadia Athenaeum. Gus MacDonald, Associate Editor of the Moncton Times and Transcript is the professional member of the commission. He was appointed by Rimoin, and the Advisory Board of the *Argosy*.

The terms of reference of the commission include an investigation of the circumstances surrounding Rimoin's dismissal, and a study of the *Argosy's* constitution to determine if it is accordance with the CUP Code of Ethics, and CUP Charter.

President Cragg and the *Argosy* Advisory Board have agreed to the latter, but have refused to recognize the legitimacy of the former, saying that the dismissal is an internal matter of the University. Rimoin in a telephone interview with the *Brunswickan* said he was not as confident of his hopes for re-instatement as he was two weeks ago.

Members of the advisory board are two students, Veronica Morgan and Joan Leslie, and two faculty members, John Houtsma (Professor of Economics), and George Crawford (Professor of English).
