

## HANDWORK

Take a piece of paper about six inches by eleven inches, fold it into a cornucopia and paste.

Carefully cut off the top so that it looks like this.

Next push in the point so that it looks like this. And there you have your tiny paper flowerpot.

Now fill the pot with earth and plant some sweet alyssum seed in it, just covering the seeds with a sprinkle of earth. Carry the pot home

This is to be done for Lesson IX. I wonder why. Your teacher will help you to guess.
