### Make the Cows Work

The difference between cows with a separator, and cows without a separator, is just the difference between "keeping" cows and cows "keeping" YOU.

### **Cet a De Laval Separator**

and produce, in comfort, two pounds of butter from the same source which, with drudgery, yields one to-day. Don't have cows around simply as part of the farm picture: make them work for you.

## WHERE IS YOUR DIFFICULTY?

No sensible man can doubt the value of Life Insurance. To the rich man and the poor Life Insurance is a strong tower of defence against the uncertainties of life.

But many neglect insurance because of imperfect knowledge. They have, it may be, a vague idea of the nature of Life insurance, but have no remote idea how innumerable are the benefits of a modern Life Policy, how perfect in design, and how thoroughly the Policyholder is protected.

They know little or nothing of the many features of a policy, outside protection for others. Investment for oneself, after a short period the right to borrow mon y and the certainty that inability to pay premiums will by no means void te Policy, the safeguard of an abundant reserve, freedom of residence and occupation, all are provided for under the Policies issued by The Great-West Life Assurance Company.

The Company offers the fullest advice and information to those who wish to acquaint themselves with the benefits of Life Insurance. A Special Department is conducted for that purpose. Such correspondence is entirely confidential, and if for any reason it is not convenient to have an Agent call, the whole enquiry may be conducted by mail. Personal rates and suitable pamphlets wil be submitted for quiet consideration, and there will be no undue solicitation to insure. Be careful to state age next birthday.

### TELEGRAPH OPERATORS

8,000 to 10,000 new men by March 1st—new United States law! Same dom nd in Carada as here. Basy to learn; fascinating; good salaries. Official School for the big Companies. YOU can succeed. Reduced fare. Write.

Wallace Expert Railway School, 629 Ryan Bidg., St. Paul, Minn.

#### Mr. FARMER,

While Prices are not now as good as they were a short time ago for your damaged grain you possibly are considering the advisability of feeding this to your stock. If a first-class power

is required by you to grind your grain and cut your feed the cheapest of all powers for the farmer is the Windmill. We have them in all sizes.

Next in cheapness comes a Horse Power, which we can supply you in

in any size wanted.

interest to you.

After that comes a Gasoline Engine, and in the Stickney line which we carry in sizes from  $1\frac{1}{2}$  to 16 H. P., we have the simplest and best engine for the farmer on the market, one that a boy can operate.

We have also a splendid line of grain grinders, feed cutters, wood saws, pumps and tanks

Ontario Wind Engine & Pump Co. Ltd. WINNIPEG, MAN.
