Some Important Strikes Made During the Past Week.

MANY LOCATIONS RECORDED

Attention Being Drawn to the Big Bend Placer Ground in the Revelstoke Division-A Concentrating Plant is to be Built Near

The mining review of the other camps this week shows that some important cent measurement of the ore bodies in country shows that it has \$1,000,000 worth of ore in sight. Appended is the summary for the week:

FROM EAST KOOTENAY.

Pete Henrietta and Pat Redmond drill-Pete Henrietta and Pat Redmond drilled into a missed hole in the Gem at Kimberley. The former had a leg and arm broken and Redmond was badiy cut up. A report from Windermere says that on a group of four claims on the divide between Macdonald and the south fork between Macdonald and the south fork of Horse Thief creek, owned by Messrs. Scott Van Cortlandt and West, a lead has been struck recently which is from 80 to 100 feet wide, and that the ore is of the same character as that on the Red Line. It is said to be the biggest thing yet uncovered in that section. Prospectors are rushing into that country irom

all parts.
Since January 1st, according to the Since January 1st, according to the Fort Steele Prospector, there have been 379 new mineral locations recorded, and 400 records of assessments in the office of the gold commissioner at Fort Steele.

Word has been received from Tracy creek, says the Fort Steele Prospector, that the Estella company at a depth of

about 90 feet ran a crosscut and ascer-tained the lead was 14 feet wide, all solid ore. The work of sinking the shaft will now be continued, which will tap the 400-foot tunnel now being driven. The ore which is being taken from the working is an excellent shipping product.

A strike of high grade galena ore on the Defender group, on Wasa creek, is

reported.

E. C. Egan has bonded the Emerald group adjoining the Big Chief on Boulder creek, for \$20,000.

Work may be resumed on the Dibble group at Fort Steele this fall.

IN BOUNDARY CREEK.

At the Pathfinder mine, about 14 miles up the north fork of Kettle river, all hands are busy getting everything in readiness to begin shipping ore as soon as the railway is ready to receive freight. Two shifts are being worked in the drift that is being run to tap the new lead that was struck not long since in workings No. 3, on which a shaft is to be sunkin solid ore. The drift is now in about 26 feet and is opening up almost a solid body of ore. When No. 3 shaft is tapped, which will be reached in about 30 feet, the management will be ready to stope ore out as fast as it can be hauled to the railroad.

Recent examinations of the B. C. mine of Summit camp have shown that property to be in a highly satisfactory com-At the Pathfinder mine, about 14 miles

Recent examinations of the B. C. mine of Summit camp have shown that property to be in a highly satisfactory condition. Careful estimates by competent experts place the value of the ore in sight at \$1,000,000, on which there is an estimated profit of \$600,000.—Grand Forks

A strike of 100 feet of good ore on the Emma, in Summit camp, is reported.

were issued by telegraph the committee was allowed to sit while the House was in session—an unusual privilege—and all the facilities at the disposal of the gov-ernment were utilized to make the exam-ination of witnesses and recording of ernment were utilized to make the examination of witnesses and recording of evidence expeditious and thorough. The result of the inquiry, as far as it has gone has been to disclose a condition of affairs which should be deeply regretted, not only by every true liberal, but by every only by every true liberal, but by every good citizen whatever his political lean-ings, who has the best interests of his

country at heart. It is unfortunate that Mr. Borden Halifax, who has had the matter in hand, de'ayed taking action until on in July, for it is well known that he had plenty of information upon which to proceed much earlier in the session. It is also strikes have recently been made. A rematter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter of extreme regret that the manner in which the whole affair has been handered matter that the manner in which the whole affair has been handered matter of extreme regret that the matter of extreme regret which is the same and th the B. C. mine, in the Boundary Creek dled by oppositionist speakers and papers has been so desperately unfair to those implicated and misleading to the public It is the height of absurdity to pretend that the whole liberal party, or even any considerable proportion, is in the slightest degree responsible for the deplorable condition of affairs revealed in West Huron. It is a matter of history, that for the last general election, the most stren the last general election, the most stren-uous efforts have been made in parlia-ment, and out, before the public accounts committee here, and by the employment of private detectives in Dawson City, by every device that the industry and ingen-nity of man could suggest to discover

uity of man could suggest to discover evidences of crookedness against the liberal party.
Isolated cases of mild venality have been occasionally brought to light against minor officials, but this is the sum total of results; the untiring and desperate at-tempts to show crookedness in the party tempts to show crookedness in the party or in the government have met with such absolute and uninterrupted failure that no unprejudiced observer, it matters not what his politics may be, would hesitate for a moment to declare that the party and the government, are both thoroughly and scrupulously honest. It would not require much effort for the memory to recall incidents in the history of the administration—incidents that were not matters of hearsay, but proved up to the hilt by sworn testimony before a parliamentary committee and the courts of the Dominion—that would create a contrast dark enough to show up the record of the dark enough to show up the record of the present government in a still stronger and more favorable light, but it is not my purpose to prove the whiteness of one party by demonstrating the blackness of the other; it is sufficient to demon-strate that the claims of the liberals, as a party and as a government, to a record of general uprightness of conduct and in-tegrity of purpose is thoroughly estab-lished history and justified by experi-

An unusual comical idea has taken possession of a section of the opposition, namely, that the government has been going out of its way to secure the sending of incorrect and misleading dispatches to papers in the Old Country. There is not

THE C. P. R. CONSTRUCTION V.R. TUALLY REACHES CASCADE.

Development Work on the Mining Properties About the City-Visit of Mr. Robert Jaffray to the Boundary.

Grand Forks, B. C., Aug. 10.-[Special.] -The C. P. R. track layers on Monday reached the 1,600-foot bridge across Kettle river at Cascade. The remaining timbers to be added to the bridge will be laid before Saturday night. A second bridge 120 fore Saturday night. A second bridge lactory of the construction gains, and three feet long across the gorge at Cascade will also have to be built. This work will occupy at least one week. Then track laying cupy at least one week. Then track laying per ledge on the Emma, a claim owned by Mann & McKenzie. west will be an easy matter, and three weeks hence will see trains running into Grand Forks.

The C. P. R. will start work next week on the construction of the spur to the

A. B. McKenzie, C. P. R. ticket agent and George E. ownshend, both of klossland, have been here for several days past.

land, have been here for several days past. They will visit Greenwood.

Gaspard Le Moine, a director of the Quebec bank of Quebec, is here, after making a tour of the Boundary country, where he owns large mining interests. He was accompanied by A. B. Clabon of Ross land. Mr. Le Moine visited Seattle, Summit, Wellington, Greenwood and Deadwood camps. Speaking to your correspondent he said: "The people of Eastern Canada do not realize the richness, or the enormous size of the mineral lodes of the enormous size of the mineral lodes of the Boundary country. I was simply amazed at all I saw; nor does the outside world at all I saw; nor does the outside world realize the extensive development work now in progress. I anticipate that this region will shortly become the most extensive mining section on the continent. I was greatly pleased with the Strawberry, a promising prospect on the North Fork of Kettle river. The syndicate which recentkettle river. The syndicate which recently acquired it, includes a number of Quebec capitalists. The Sunset, Mother Lode, Knob Hill and Old Ironsides, Stemwinder and Brooklyn deeply impressed me. They are great mines. The C. P. R. plainly discerned the future of the Boundary country when it undertook the construction of spur lines to the various camps." Mr. Le Moine will visit the Slocan before returning east.

ing east.
hrough some alleged irregularity in the title no lots in the Phoenix townsite, in Greenwood camp, have yet been placed on the market. Parties who have located there thus far have only been able to se there thus far have only been able to secure three years' leases without the option of purchase at the end of that period.

Ross Thompson of Rossland, is in town.

A plant, including a five-drill compressor, for the Zala M., in Sheridan camp,

Wash., passed through here yesterday.

A GRIST FROM GRAND FORKS try as Grand Forks." Mr. Jaffray will return here shortly.

return here shortly.

A remarkabe rich strike was made in the Morrison mine, in Deadwood camp, on Wednesday afternoon. In the tunnel driven in at a depth of 220 feet, the ore body which had dipped out of the main working shaft at a depth of 100 feet, was encountered. Work has been maintained continuously ever since and the crosscut is now 20 feet in ore, and the wall has not yet been found. Assays made yesterday gave values of \$13, \$18 and \$33 in gold per ton. In the workings today yesterday gave values of \$13, \$18 and \$33 in gold per ton. In the workings today chalcopirite giving from 6 to 10 per cent in copper, was struck. As soon as the wall is reached drifting on the vein will be commenced. Fred Oliver, the general manager, who was summoned from Spokane by telephone, reached the mine to-

day. The C. P. R. construction gang, engage

Grand Forks, Aug. 14.-[Special.]-Police Magistrate Johnson has received official notification from the Attorney General's office, Victoria, notifying him that the executive council had the investigated the matter of his unjust sur pension from office by ex-Attorney-Ger eral Martin, and as a result of the investigation the executive council re-in-stated Mr. Johnson as police magistrate

of this city.

Up to the present every pount freight for the Boundary country, Republic and all the camps on the ville reservation, has been brought in by wagon. The entries at the local customs house exceed one thousand per month.

It will be many a day before there is

thrift and development as Grand Forks presents today. The moving throngs on its streets, the crowds that flock into its hotels, the long processions of freight wagons that line up at the customs house, the erection of scores of new buildings, the grading of miles of new streets, the incoming of a great railway line, and finally the construction of the most extensive smelting works ever erect-ed in British Columbia, make altogether a scene of activity that will be memorable in the history of this portion of the country.

Over one million feet of lumber flume that will convey water from the Kettle river to the smelter. In a short time the company will begin the work of clearing of 500 acres above the dam. This land will be flooded by back water and every foot of timber will be removed before the water is allowed to cover the

A. B. Clabon of Rossland, has arrived here to start development work on the Strawberry and Orphan Boy, two north Strawberry and Orphan Boy, two north fork properties. He will have them surveyed this week and will apply for a crown grant. The next step will be to incorporate a company to take over the properties. This he arranged for on a recent trip to Quebec. The incorporators will include Hon. R. R. Dobell, Hon. John Sharples and V. Boswell.

Smith Curtic of Rossland, is visiting

ried on during the past three months un-der his direction.

The Kootenay Electric Supply & Construction company of Nelson, B. C., has decided to open a branch for the Boundary country in Grand Forks, owing to its central location. W. P. Dickson, one of the partners, will be in charge.

AND ABOUT GREENWOOD

A RICH STRIKE MADE IN MOUN-TAIN VIEW, SUMMIT CAMP.

Combination of Local Sawmills Formed-Particulars of the Fatal Accident at the Mother Lode.

Greenwood, B. C., Aug. 8.-[Special.]-A terrible accident occurred in the Moththe signal, thinking that the slow signal of three rings had already been given by the men themselves, which means that someone is going up. Only one bell sounded in the engine room, and the bucket was brought up swiftly as if freighted with ore. The men became excited as they got to the top and two of them jumped, one landing safely on the into the shaft er Lode last night about midnight, by them jumped, one landing safely on the landing and the other fell backward down into the shaft, a distance of 214 feet. Death was instantaneous, part of the head being completely knocked off by the fall. The body was otherwise not badly mangled. The body was lifted as soon as possible and today was conveyed to Greenwood and will be buried tomorrow.

Metalli was an Italian the column of the rail smelter, shipping about 25 tons daily. When the railroad is at Grand Forks it will be only 35 miles from Republic. Within a month the railroad will be running into Greenwood, which will ensure a lively winter for Republic. Mantello was an Italian, the only one in the employ of the Mother Lode company, and was well liked by all the men. An and was well liked by all the men. He inquest was deemed unnecessary, as the accident so far as could be ascertained was due wholly to a mistake on the part of the men themselves. This is the first accident of any kind that has occurred

in three years on the Mother Lode.

A rich strike was made in the Mountain
View, Summit camp, this week. Collins,
the manager of the Golden Crown, has a bond on the property, and in sinking through the surface showing of copper oxides, struck, at the depth of six seet, a very fine vein of copper pyrites, in every respect identical with the B. C. mine, which it adjoins on the south and west side. Of course the shaft has not yet been sunk far enough to determine values but the surface showings are very fine, with high assays in copper. Although the width of the vein has not yet been determined, the distance between contact is 33 feet, and the shaft is all in ore. The foot wall is lime and the hang-

THE ADMINISTRATION IN THE CONTROLL AND ADMINISTRATION IN THE CONTROL

CANADIANS VISIT REPUBLIC

JAFFRAY, COX AND RYKERT IN. SPECT THE MINES THERE.

They Express Themselves as Pleased With the Camp-Holdups and Burglaries Are Numerous.

Republic, Aug. 8.-[Special.]-The past

two days were rather Canadian days here. E. G. Rykert, of McCuaig, Rykert & Co., the great Canadian promoters who floated

the Republic and other mines in British Columbia; Robert Jaffray, president of the Toronto Globe, and heavily interested Rich Mir in mining and other interests in British Columbia and Republic; Mr. Cox, brother of Senator Cox of Ontario, and Major Pellet of Toronto, were here a couple of days, and under the guidance of Major Leckie, manager of the Republic mine,

they visited the Republic, Mountain Lion, San Poil and Surprise. Their trip was no primrose journey, as they took in Camp McKinney and all intermediate camps in which they were interested. On all their trips Major Leckie accompanied them. Today the party started for Greenwood and Rossland. They have taken in all to the Trail smelter, shipping about 25

Peter Erickson is in from Park City. Independence, one of the promising raims of that district. The success croppings of assays run very good in gold, silver and copper. His intention is to continue development work. It will be a shaft and tunnel proposition. Considerable assessment and development work is going or in the Park district, and considerable ment and rather favorable deals are on the tapis. So far developments have been so satis factory that generally work is being con-tinued, the ledges and assays being more than encouraging. From all directions leading to Republic the wagon roads are being constructed, with the promise of stages to Kettle Falls and all other points that can construct a level and fast route. The town is sadly in need of quick com-munication, for half the time we are short of a great many necessaries, even from

postage stamps to money.
