

## THE HAMILTON TIMES

FRIDAY, NOV. 22, 1907.

## CALL WHIP TAYLOR.

At the London bribery trial yesterday, witness from Brockville testified that during the election in that constituency he heard that Mr. George Taylor, M. P., the Tory whip, was in the riding "spending money and sending out letters containing money," and he said that in methods both sides were alike. This sort of testimony did not seem to suit Mr. George Lynch-Staunton, the Crown counsel, who said, "I don't care who does it, it has got to stop."

What will Mr. Staunton or the Attorney-General do to stop it? Will they tell detectives on the case and spend thousands to get at Taylor and his co-workers in the Tory party?

Perhaps. But don't you think you see them doing it?

## FLEEING THE TAXPAYER.

The piling up of municipal debt has been going on very briskly in the last ten or fifteen years, and a good many places find themselves in Hamilton's position—called upon to devote the larger part of their revenue to paying off old scores—so that it is a hard struggle to meet present demands without placing a crushing tax burden on the people. But still there is no let up. The schemer and the promoter seem to be able to get Councils to add to the burden annually, even when current needs have to be met by large over-drafts at bank rates of interest. In the Northwest, where perhaps rapid expansion has outrun prudence to a greater extent than in the east, some of the towns are confronted by grave financial difficulties. Regina has trouble in making ends meet, and still wants to sell debentures at 90 to plunge into other great spending schemes to cost over half a million. The banks carrying the city's overdraft naturally think it should pay up. Medicine Hat is trying to mortgage its waterworks and gas systems to raise \$200,000 at 7 per cent. Calgary is seriously in need of money. Brandon is offered only 84 for \$150,000 of its 4-1/2 per cent. bonds. In Ontario the municipalities have within recent years doubled their debt, and the prodigal dance goes on, all sorts of schemes to put burdens on the taxpayer being advocated. Instead of appreciating that this should be a time for exercising caution and avoiding the increase of debt burdens, the average municipal councillor seems to be bent on doing his full share to aggravating the difficulty and taking it out of the taxpayer. Not satisfied with operating within the legitimate field of municipal endeavor, they are now seeking to place burdens of millions of dollars more on the taxpayers to exploit schemes of socialistic "ownership and operation," which, even if they realize their promoters' expectations, can benefit only a few, while they mortgage more heavily the property of the people to pay for them. It is time that the man who pays should wake up.

## EDITORIAL NOTES.

Parliament is to reassemble next week. Already the wind is rising.

The strongest argument in favor of capital punishment is rooted in the objection of society to being murdered.

Please do not insist on the Technical College as Hamilton's right. You might annoy and irritate Whitney. That's the Herald's plea.

Why should the Herald regard the building of a Technical College here as a "bribe"? Hamilton is due that as a matter of justice.

The Montreal Star now endorses the building of the Government section of the National Transcontinental Railway by commission. But will its endorsement remain good over the session?

The Finance Committee last night voted down a motion in favor of a standard loaf of bread. In which matter we incline to the belief that the committee is not in harmony with public sentiment in the city.

The Junior Tory organ, the Herald, which the local machine always relies on to do any dirty work that is beneath the Spectator, says Times Liberals are not decent. But when Times Liberals reflect on whence comes the intended insult, they will not worry about it.

Hamilton cannot be bought with a technical school, in spite of the Herald's insinuation. We want that Technical College as a matter of right and in fulfillment of the Government's pledges. Government owes it to us, and should pay its debt.

There is a very strong feeling in this city where Mr. B. Reid, the engineer who was driver of the train which met with disaster at Oronook, is so well known and highly respected, that his case deserves favorable consideration at the hands of the Crown authorities. The engineer was largely the victim of circumstances, and the law having asserted itself, and he having already served between two and three months of a nine months' sentence of imprisonment, mercy would not be misplaced in giving him his liberty. The object of the law has been accomplished; the lesson it aims to teach has been taught, and we think Mr. Reid might now be restored to his family and friends with safety to the community and the law's dignity.

Mr. Graham B. Kelsey, of Toronto, and others, at St. John, N. B.

## Great Bargains for Saturday, November 23rd
