

MISCELLANEOUS.
BLOQUENCE OF A LOOK.
"Surely," says Blunt, "no malefactor, condemned to suffer for the violated laws of his country, ever heard the last hour strike upon the prison bell with half the agony of feeling with which the cock-crowing rang upon the ears of Peter."

ONE MAN'S MEAT IS ANOTHER MAN'S POISON.
Alimentary substances are substances which serve us for nourishment; but a great mistake is made when it is imagined that their nutritive value can chiefly reside in the amounts of carbon, nitrogen, hydrogen, oxygen, and salts which they contain; it resides in the relation which the several substances bear to the organism they are to nourish.

A LITTLE CONJUGAL DISPUTE.
The male and female news have now resided a week in a private crystal palace of a globular shape. What we observed about them, imprints, was, that they lived like Mr. and Mrs. Brown, and always quarrelled at dinner time. A worm was given them; the gentleman did not wait for the lady, but seized the one end of the worm while she seized the other; each gulped their portion down as fast as Italians their macaroni; but there must be an end to all things, and worms are included in the category.

ANECDOTE.
One Sabbath, as a Sabbath school teacher had been to return the books to the Librarian, he was leaving against a pew, noticing the conduct around him. The multitude seemed employed in reading, passing events, and making and returning resolutions.

A NAVAL GAME COCK.
On the memorable 1st of June, (Lord Howe's victory), Captain Berkeley commanded the Marlborough and broke through the French line between L'Impetueux and Le Mutius, each of superior force, and engaged them both. On going into action the captain ordered all the live stock to be thrown aboard, and at the request of his crew permitted them to retain an old game cock, with which they had fought several times, and always with success.

OUT OF OFFICE.
Lord Lyndhurst tells a good story apropos of his surrender of the Great Seal in 1846. "When I went to the palace," says his lordship, "I alighted at the grand staircase; I was received by the stick boy and silver, and other officers of the household, who walked in sonorous tones, firm landing to landing, and apartment to apartment. 'Room for the Lord High Chancellor of England.' I entered the presence-chamber; I gave the seals to her Majesty; I had the honour of kissing her hands; I left the apartment by another door, and found myself on a back staircase, down which I descended without any one taking any notice of me, until, as I was looking for my carriage at the outer door, a lackey bustled up, and with a patronizing air, said, 'Lord Lyndhurst, do I do anything for you?'"

COFFEE A LA TURQUE.
Commonly, at least in Europe and in this country, the French method of preparing coffee for a beverage is deemed the best. Travellers in the East assure us, however, that coffee a la Turque, is preferable to all, although at first it is not relished as much as when made in the common way.

COOKING FOOD FOR ANIMALS - In France horses are, in some localities, fed on baked loaf of coarse bread, at a saving, it is said, of half the meal.

OXEN CO. HORSES - Oxen cost far less, and can be kept cheaper than horses. The wear and tear of the yoke and chain is less than that of a set of horse harness, and if an accident, such as breaking a leg, should occur, he is not a dead loss, for, if kept as he should be, and as any farmer will find it in his interest to keep his cattle, he will make beef, while a horse in like circumstances would be a dead loss.

FOR THE SURE DESTRUCTION OF RATS, MICE, COCKROACHES, ANTS, &c.
This preparation differs also, in its effects, from all others, as they do not die in their holes, but instantly leave the premises in the quiet possession of the occupants; and it is every instance warranted. All vermin and insects that infest the premises are killed on contact with this preparation, and it can be used with safety under all circumstances.
