AND IMITATIONS.

to a N. Y., Commercial Advertiser man a eye, lacking the rainbow gloss of true few days ago. 'To begin with diamonds, these are almost all found at 'The last time I was in Paris I came from Brazil - old mine ' diamonds, as know, are frequently out in half taken to London, which is the one great his make and it was really an excelthe city, but the center of the trade and they turned out just as good as the 20 ASH there is Hatton garden near Ludgate sample. But how they are made is hill. From thence s great many are secret which I can't tell you, because taken to Amsterdam to be out; others I do not know. are cut in Antweip or in Paris, and Returning to diamonds, I may say 2 BLACK WALNUT SUITS.

over the world.

Almost all that are sent to this largest ever cut in this city was the over the world. country come by the fastest steamers, Cleveland gem, which was found in Brazil with regular bills of lading. They are and brought here about two years ago. placed in charge of the purser, and That was purchased by Minuie Palmer are always the first goods taken from the actress, and I believe is in her pos on board after the mails. They go session still. She gave \$40,000 for it. through the custom house in regular Some time before that a man brought course, and pay a 10 per cent. duty. a rough stone here that weighed 200 They are never sent through the mails carats, and tried to dispose of it, but Household except by persons wishing to defraud he could not get his price from the the the Government. Sham diamionda dealers here, and the stone is now being are manufactured principally in Paris. Some very fine ones, that by all but ex. one centre for diamonds on this side of perts would be taken for real, are manufactured there. The smaller the atone from \$500 to \$1,000 are freely handled the more easy is the imitation. It is and readily disposed of here, as there is very seldom that sham diamonds are sold a brisk demand at those prices. But for true ones, as even pawnbrokers, for other stones real or sham, there is who are not usually considered very not much request at present.

scrupulous, did not care to run the risk. But regular swindlers go about who carry two or three in their pockets

with a sham stone.

'With regard to manufacture of sham diamonds; a great deal of nonsense has been talked about melting down diam glass known as paste, is out to resem prevents, if it will not oure, the chicken ble a diamond by experienced work, cholera.

There is a very large trade in sham diamonds doing this year. I have sold many more than ever before, and every one else in the trade says the same. People are so fascinated with diamonds and the same or quite as nutritive as sweet ones. They now that they won't look at a piece of should not, however, be given to hogs jewelry that basn't one in it, either real or false. Dismonds doubtless are make the pigs' teeth sore.

one stone, and when set no one but a trained expert could recognize the dif.

A Sect of Murderer's in Russia. trained expert could recognize the dif-ference. The test of a file to the glass, A horrible religious sect has been when they are removed from the setting, reveals the sham at once, as the steel 'bites' on glass but runs smooth ly over true stones. A trained eye tells the difference between true and the flower ment of Saratoff.

death but for his timely interposition. Both the mother and the aunt of the price. Another class of imitation stones are made among the Jura mountains, and these are of somewhat better grade. There is also a district in the United States where such are manufactured. This is Providence and the surrounding villages.

'Real stones of color are many of them of great value. Rubies, good and large, are very scarce and more costly, weight for weight, than diamonds. Those of a poorer class are, however, much cheaper. Next to them comesapphires, which, when of good quality are priced nearly as high as diamonds, but not so high as rubies. Small, imperfect stones are cheap enough. The same applies to emeralds. Large pearls are still very costly, if of fine color and regular shape. The best pearls are found only in the Indian seas. Attempts have been made to cultivate the pearl oyster in Italian waters, but with little success so far. There are also American pearls, coming from Texas and from Panama, but these are not very valuable, as they lack the parts are still very very valuable, as they lack the parts are for very valuable, as they lack the parts and the aunt of the both the aut of the such that such the man in red death of the such and the auth of this sect, and it was they who had intended putting of the wood in who had intended putting the sub series as this was his sort of the sub ship is called. The Sea Serpent.—Henry H. Crocker, Harper's Magazine for October. The Sea Serpent.—Henry H. Crocker, Esq., of New York, a summer resident of Barntable, advances the very plausible theory that the numerous sea serpents' reported to have been seen in different sections are in reality sea turtles! The sea turtle, like the one recently captured at Dennis, and since drifted ashore on Mr. Crocker's landing at this place, has a long neck which it elevates several feet about its body, has eyes that are large and protruding, and its elevated back fin or shell its back bone and tail being the ouly parts visible besides its head and neck, as it moves through the water, gives it a very snake-like appearance—tallying pretty closely to the descriptions given of the often-reported sea serpent. It is only deficient in length, and that a vivid imagination would very naturally supply.—Barnstable Patriot.
