

September, 1861. Certify that we carefully examined D. W. Seelye's Patent scientific Churn and saw it make a superior quality of butter from sweet milk in less than three minutes, leaving the milk as sweet it as before churning. This Churn involves a new principle, and we

McKENY, Ganson, Waterous & Co's Horse Power, Bradford, C. W.

believe far superior to any Churn that we have ever seen, and take pleasure in recommending it to the public as one of the most valuable inventions of the age. We awarded it the highest premium, and recom-

mended the board of officers to award it an extra premium for superior merit.
