

very useful to those who desire to acquire an introductory knowledge of the important subjects treated of in it. The work is a small octavo of 191 pages, in small but neat type. It contains no less than 108 illustrative plates, which must materially aid the reader in his study of this interesting and useful department of modern medicine.

THE BASIC PATHOLOGY AND SPECIFIC TREATMENT OF DIPHTHERIA, TYPHOID, ZYMOTIC, SEPTIC, SCORBUTIC AND PUTRESCENT DISEASES generally, by George I. Ziegler, M.D. Philadelphia, G. I. Ziegler. Toronto: Williamson & Co. Price, \$2.00.

This work contains a general summary of the basic pathology and specific treatment of the above diseases from the author's point of view, viz: the pathogenic factor, ammonia engendered from within or introduced from without the economy. The work is very interesting and will well repay a careful perusal.

ELEMENTS OF PRACTICAL MEDICINE by Alfred H. Carter, M.D. New York: D. Appleton & Co. Toronto: Williamson & Co.

It is only necessary to mention in evidence of the high appreciation of this work by students preparing for final examination that within a comparatively short time a third edition has been called for. The work is compact and comprehensive, and will be useful as an aid, and convenient for reference, to students in attendance on lectures or clinics.

HOLDEN'S ANATOMY.—A Manual of Dissection of the Human Body, by Luther Holden, late President of the Royal College of Surgeons, England, etc. Fifth edition. Edited by John Langdon, Lecturer on Anatomy at St. Bartholomew's Hospital, etc. With over two hundred illustrations. Philadelphia: P. Blakiston, Son & Co. 1885. Toronto: Willing & Co.

This excellent work on practical Anatomy has many points of special merit to commend it as a manual of dissection. The descriptive part is concise and accurate, the relative situation of parts is made clear, and many valuable practical suggestions are thrown out here and there as to diseases and injuries which are liable to occur in the part under consideration. A number of new diagrams and illustrations are introduced in the present edition, and more space is given to the consideration of the anatomy of the nervous system.

THE PHYSICIAN'S POCKET DAY-BOOK, by C. Henri Leonard, M.A., M.D., Detroit, Mich., 1885.

This will be found a most admirably arranged companion to the practitioner. It differs from most of its kind in having no other matter except the daily record of business, obstetrical memoranda and miscellaneous accounts.

DRUGS AND MEDICINES OF NORTH AMERICA. A Quarterly Journal devoted to the botany, pharmacy, and therapeutics of the medical plants of this Continent. Cincinnati: J. & C. Lloyd.

We have received the first and second numbers of this interesting and practical Quarterly. The work is an entirely new venture, and has a wide field of usefulness before it.

TEXT-BOOK ON HYGIENE by Dr. George H. Rohé, Professor of Hygiene, College of Physicians and Surgeons, Baltimore. Toronto: Hart & Co.

The above work is an admirable compendium of Sanitary Science and well adapted for students.

MANUAL OF BANDAGING by C. Henri Leonard. Second Edition. Revised and Enlarged. Published by Illustrated Medical Journal Co., Detroit.

RELATION OF ANIMAL DISEASES TO THE PUBLIC HEALTH, and their Prevention, by Frank S. Billings, D.V.S. New York: D. Appleton & Co. Toronto: Hart & Co.
