High-Class Printing Presses
for all kinds of work

THE CRANSTON-VICTOR

Is a Four-Roller, Two-Revolution Press of the highest grade. It is specially designed for doing Half-tone Printing, and other First-Class work. It is 25x38 inches in size, and will print a sheet of Double Demy, which is the most generally used size of paper in Canada. Its speed is equal to all requirements. For rigidity of impression, perfect distribution, accuracy of register, smoothness of running, and durability, it is unsurpassed. While the Victor is an aristocratic press, it does not feel above printing a common job, at a speed equal to the ability of the feeder.
