

- Multiple proportions and the atomic theory** 142, 143
 law of 95-97
Murdoch discovered coal-gas 187
Muriatic acid 154
- N**
- Napoleon and sodium carbonate** 262
Natural waters 49, 50
Neon in air 29
Newton and the atomic theory 141
Niton 147
 in air 29
Nitrates 245
Nitrate, potassium 267
 test for 245
Nitre 241
Nitric acid 242-245
 and copper 248
 and gold 243
 and phosphorus 244
 and platinum 243
 and sulphur 244
 and zinc 244
 an oxidizer 244
 commercial preparation 243
 history 242
 manufacture of 250, 251
 preparation 242, 243
 properties 243
 test 245
 use 245, 246
Nitric anhydride 244
Nitric oxide 248, 249
 and oxygen 249
 and phosphorus 249
 burning in 249
 preparation 248
 properties 249
 test for 249
Nitrocellulose 246
Nitrogen 10, 22-28
 active form 26
 history 22
 liquefaction 25
 and magnesium 25
 oxides of 247-250
 preparation 23, 24
 properties 25
 sources 23
 uses of 26-28
- Nitrogen chloride** 255, 256
Nitrogen peroxide 245, 249, 250
 and water 249
 a catalyst 227
 heating of 250
 Priestley on 249
Nitro-glycerine 246
Nitrous oxide 247, 248
 burning in 248
 preparation of 247
 properties of 248
 use 248
Nomenclature 133-137
 Lavoisier on 133
Non-metal, definition of 21
Normal pressure 70
Normal temperature 70
N. T. P. 70
- O**
- Oil of vitriol (See sulphuric acid)** 223
Organic chemistry 169
Oxidation, by hydrogen peroxide 282
 by nitric acid 244
 by sulphur dioxide 221
 by ozone 281
Oxides 232, 233
 classification 232, 233
 of nitrogen 247-250
 producing acids 20
 producing bases 20
Oxy-acetylene blow-pipe 186
 flame for cutting iron 22
 for welding 22
Oxy-hydrogen blow-pipe 66
Oxygen 13-22
 action of pyrogallic acid 19
 and ammonia 253
 and hydrogen 65, 66
 and hydrogen chloride 154, 157
 and mercury 204
 and nitric oxide 249
 commercial importance 21
 combustion in 19
 discovery of 10
 from mercury oxide 14
 from potassium chlorate 16
 from saltpetre 13
 from sodium peroxide 18
 effect on mice 21
 history 13
