RAILROADS WILL TAKE IMMEDIATE STEPS TO GET HIGHER RATES

WASHINGTON, D.C., Oct. 23.—Immediate steps will be taken by the railroad companies to obtain an increase in freight rates, it was announced today after a lengthy conference between Director-General Hines and representatives of the Association of Railway Executives.

Mr. Hines reiterated his previous decision not to make a general readjustment of rates during federal control of the roads, but offered to assist the companies with all the information the railroad administration has.

SIX MILLION TONS OF U. S. COAL FOR EUROPE

LONDON, Oct. 23.—A dispatch to the Evening News from Cardiff says that W. H. Garner, a Swansea coal operator, on Wednesday in Paris completed an arrangement under which 6,000,000 tons of gas, steam and ordinary coal are to be shipped from America to continental ports.

C. M. A. SAYS BOARD OF COMMERCE GIVES WRONG IMPRESSION

Demands Change in Method and Personnel.

REPUTABLE FIRMS HURT

Objection Taken to Assumption That Profit-Making Reprehensible.

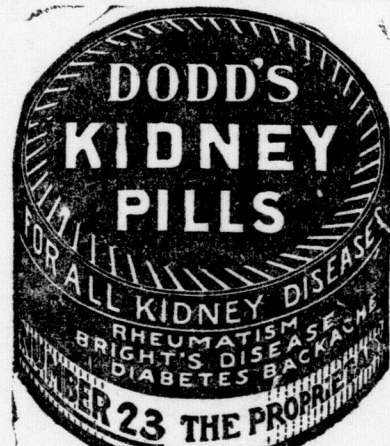

OTTAWA, Oct. 23.—It would appear that the board of commerce has fallen under the displeasure, not only of certain sections of the farming community, notably dairymen, but also under the displeasure of the Canadian Manufacturers' Association. Rural members in the House have raised their voices on several occasions against the board's interference with the price of milk, butter and cheese. Yesterday a deputation of the C. M. A. came to see the Government and had a somewhat lengthy conference. It was generally understood that the matter under discussion was the tariff in view of the fact that a ministerial inquiry looking toward future revision is in contemplation. But the chief subject of debate was the commerce board.

The deputation did not ask for the discontinuation of the board, so much as a change of method and personnel. The members contended that in its hunt for evidence the board frequently caused serious inconvenience to firms engaged in fair and legitimate business. They objected to the assumption that ability to make profits was a reprehensible thing. The fact that one firm made higher profits than another of equal capitalization, they contended, should not be construed as an evidence of improper practice or profiteering on the part of the first, but might very well mean that the latter was being conducted on greater lines of the efficiency than the former, a condition which should be encouraged rather than discouraged.

URGES CREDIT PLAN TO HELP STRUGGLING FOREIGN NATIONS

U. S. Commerce Secretary Proposes Organization For This Purpose.

ATLANTIC CITY, N. J., Oct. 23.—Formation in this country of a credit granting organization to purchase securities of struggling foreign nations was urged at the international trade conference today by U. S. Secretary of Commerce Redfield. The organization, which would be supervised by the federal reserve board, would be capitalized at between \$500,000,000 and \$1,000,000,000 and would issue bonds of small denomination and low interest to be sold here. The secretary said that several billion dollars would be needed by struggling nations in the next few years to place themselves on a firm footing. "I hope and believe," he added, "that we shall open our doors much more freely than we do now, to receive goods from abroad. We cannot sell if we do not buy. We cannot get along by selling goods and asking capital in return. I hope that the time will come when the biggest men of this country will get so much vision that the system of selling goods abroad and demanding cash will not be respected."

After Years of Experience

With different types of ranges the women of today are turning to Cabinet Gas Ranges for their emancipation from kitchen slavery.

Why Not You?

They provide you with a tireless servant that will cook a whole meal as deliciously as the best chef.

These ranges are mechanically perfect and artistically attractive. All parts are clean cut and fit like sections of a cabinet. Even linings are removable. There is no part that can't be easily detached for cleaning or inspection.
