TRADE IMPROVEMENTS

FOR FAL GOODS

More Activity at Ontario Centres - Alberta Outlook Promising

Winnipeg, Oct. 5. - (Canadian Press) - Reports from ten of the principal trade centres of Canada indicate trade looking up and an increased demand for seasonal goods, says the weekly report of Canadian Credit Men's Trust Association.

Toronto and Ontario advisers report a little more business stirring in general dry goods and in ladies' wear of different kinds. Wholesale hardware trade and kindred lines are fairly good but clothing and boots and shoes are very quiet up to date. Retail trade is only fair.

Montreal, Quebec and district in proximity report increased demand for reasonable goods. Ladies' wear is better, wholesale boots and shoes however report improvement, and grocery houses have fair business with very few changes in prices. Collections are fair.

MILLBANK

The Best 15¢ Cigarette

Retail trade is about the average, but many sales are on, which gives a better showing on the surface than in reality. St. John, Halifax and Maritime Provinces report increase in business activity. Retail trade, while active, is not more than last year in volume, although prices are very good. Collections are slow and credits being closely watched. Winnipeg, Manitoba and districts find immediately delivery orders coming in, but retailers hesitating in looking ahead. Retail trade is fairly well up to the average, excepting in ready-made clothing and boots and shoes, both of which trades require hard pushing. Calgary advisers say "wonderful harvest and splendid crops" means outlook very promising. Staple food lines active with conservative buying. Collections are fair, and taken altogether there should be a good winter's business. Other advanced prices are quoted on

bar iron and steel, roofing nails and wrapping papers. Gas engine, cylinder and other lubricating oils have been increased in price. Polishing oils and mops have a higher price. Some lower prices are quoted this week on window glass due partly, it is said, to a weaker tone in the Belgian markets and the arrival of some imports from that country. Hardware and Metal understands, however, that it is very unlikely that supplies of window glass will be available in any large quantity from that source for some time to come. Stocks of wire nails which have been very low for some time are said to be somewhat improved, but the scarcity of large headed roofing nails is still very acute. Very little improvement is noted in supplies of black and galvanized sheets and plates, or of pipe and pipe fittings. Bar iron and steel are also extremely low in stock. Hardware and Metal understands that stocks of some of these are in better shape in some of the mills, but transportation remains the chief difficulty, and no material change in this direction is expected for some time yet. There seems to be some indication of a decline in hardware prices as the primary markets in iron and steel show the recent advances on wire and wire products this is hardly a surprise. Other advanced prices are quoted on

CATARRHAL DEAFNESS MAY BE OVERCOME

If you have Catarrhal Deafness or are even just a little hard of hearing or have head noises go to you druggist and get 1 ounce of Farmint (double strength), and add to it 1/2 pint of hot water and a little granulated sugar. Take 1 tablespoonful four times a day. This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Anyone losing hearing or who has Catarrhal Deafness or head noises should give this prescription a trial.

WHEAT FROM CHINA

Chinese wheat for the first time now is reaching the European markets in competition with wheat from Canada and the United States. According to The Amsterdam Advertiser, the Dutch government, as well as private buyers, is negotiating for the purchase of the Chinese grain, the quality of which is good, but not equal to the best Canadian grades.

Tobacco Teeth

See the change in ten days.

All statements approved by authorities

Smokers' teeth discolor more than others, usually. But the stains lie in a film, and removing that film removes them. Millions of people employ it. Leading dentists everywhere advise it. See how teeth whiten when you use it a few days.

Film ruins teeth

That film on teeth which makes them dingy causes most tooth troubles. It is viscous - you can feel it. It clings to teeth, enters crevices and stays.

The old ways of brushing did not end it, so millions found that well-brushed teeth discolored and decayed. It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Very few people have escaped these troubles caused by film.

Pepsodent

THE NEW-DAY DENTIFRICE

A scientific film combatant, combined with two other modern requisites. Now advised for daily use by leading dentists everywhere. Supplied by druggists in large tubes.

Now we combat it

Now dental science has evolved ways to combat film day by day. Able authorities have amply proved their efficiency. These methods are combined in a dentifrice called Pepsodent. Millions have adopted it, largely through dental advice. It opens, we believe, a new dental era. And, to let all know it, a 10-Day Tube is being sent to everyone who asks.

See and feel it act

Pepsodent brings five desired effects. Some are instant, all are quick. A very short test will prove a revelation. One ingredient is pepsin. Another multiplies the starch digestant in the saliva, to digest starch deposits that cling. It also multiplies the alkalinity of the saliva, to neutralize the acids which cause tooth decay.

Two factors directly attack the film. One of them keeps the teeth so highly polished that film cannot easily adhere. With every application it combats the teeth's great enemies as nothing else has done. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Let this test show you, for your own sake, what clean teeth really mean.
