CRIPPEN AND COMPANION ARRESTED ON STEAMER

(Continued from page 1.)

brandy. As she took it she threw
something out of the port-hole and
quick as were the officers to jump they
did not even see what it was. She
held her hands to her head all the
time, moaning. When the search be-
gan she collapsed and the doctor had
to be called. She had recovered by
night, however, and ate dinner.

The arrest of Crispin himself was
made at nine sharp. Dew was not sat-
isfied with the search of Crispin him-
self and made another. He found a
linen belt concealed next the skin but
attached to the shirt with diamond
rings, ear-rings and a stick-pin.

The two were registered as John Filo
Robinson, merchant, age 31, and John
George Robinson, 15, student. They
were supposed to be on their way to
Detroit.

Dew would not make a statement,
but gave it to be understood that he
did not think the girl had been
accomplished of the murderer, and the
passengers say the same. The man
was nervous and evidently had some-
thing on his mind, but the girl was
gay and happy, except for spells of
depression. The couple would never
have been noticed if the girl had not
been dressed as a boy. She is small but
well built, and the boy's dress did not
conceal the outlines of the woman. All
the officers and many of the passen-
gers knew that she was a woman, and
with the papers of the Crispin case
they approached Father Point. He
spoke of it to the captain. The three
officers went carefully into the case
and decided that they were the two
wanted.

Kendall was asked what he would do
with the reward. "The what?" he
asked. "I did not know that there was one."

The great fear shown by Crispin as
they approached Father Point was
that his companion would be discover-
ed.

Land From Steamer.
(Times Lensed Wire.)
Quebec, Aug. 1.—Married and closely

Quebec prison. Miss Elsie Claire Leneve,
his stenographer, charged as accessory in
the murder, also was taken off the
liner Montrose and placed in a cell in
the women's prison.

the despatched publicity given to the
murder and
