WITH DOWSWELL'S PATENT GAS ESCAPE VENT.

A. -Patent Gas Escape Vent, which, being in two pieces. can be taken apart and quickly cleaned.

Dowswell's Patent Vent prevents all accumulation of gas, so that you can go straight ahead without, once stopping to remove the lid, and thus do your churning in one-third less time than with the ORDINARY barrel churn. Dowswell's Patent Cover arrangement allows the utmost freedom in washing and cleaning the churn. The top is not partially closed in like other barrel churns. All butter makers will appreciate this great advantage. No 1 to churn from 1 to 6 gais, cream. No. 3 to churn from 2 to 10 gais, cream. No. 4 to churn from 2 to 10 gais, cream. No. 4 to churn from 2 to 13 gais, cream.

MR. BIRRELL, manager of Farmers' Dairy Co. (largest butter makers in the city) is delighted with this churn, and asys: "I have made a thorough test of the "Leader" Churn, containing Dowswell's Patent Gas Escape Vent, and have no hesitation in saying that it is the best Barrel Churn I have ever used. The butter was beautifully made and no stoppage was required to let off the gas. I believe it to be an economical churn, and one that will be in great demand when its merits shall have become freely known by butter makers."
